Canon size: 50 X 5 CM

Reference: LASER-LAMP

Name: Disco Laser light projector for pubs, DJ, party, etc.

Price: 80 Euros

The LASER-LAMP is a compact, full-colour laser projector useful for parties, discos, pubs and any event that needs up uplift. It projects 12 different designs on to the wall or the ceiling. The laser posses two levels of speed. The internal microphone can be synchronized with the sound to provide a spectacular show of lights in accordance to the music. Power supply can be administered via batteries (included) or thru source of electricity (not included).

Perfect for parties, discos, pubs o just to ¡¡ brighten up your house party!!

Package incluyes:
- Disco laser DL 112.
-Mount
-4 Batteries
-Instructions manual

Technical information:
Works with batteries: 6v CC (4 batteries included)
Source of Electricity: Input 230 V CA, 50Hz; Output 9V CC 300mA (not included)
Laser voltage: >3 Mw.
Weave length of the laser: 650 NM
Type of laser: 2A
Dimensions: 13, 5 x 12 x 8cm
Weight: 413 gr.

Reference: INKVISIBLE

Name: Invisible Ink Pen with UV light for spying and detecting

Price: 10 Euros

Your writing can only be viewed by applying a black UV light on the writing.

The ink is visible under ultraviolet light.

Each invisible ink marking pen contains invisible permanent ink. It's safe and reliable and easy to use.

Multiple uses:

Detect fake notes : Thanks to the built in UV light you can now identify false currency notes.

Mini Flashlight : You can use the light in case of an emergency.

Invisible INK: spy pen features ink that is made of special high-brightness compounds that are invisible to the naked eye, but magically illuminate when exposed to ultraviolet light. A blacklight is conveniently located on the opposite end of the pen, allowing you to read any messages left to you by your spy friends, perfect for writing down secret spy messages, it can also be used to mark your valuables with your name and phone number. Most importantly, it can even give you a hand at passing your exam.. no one has to know!!

Writing is visible under ultraviolet light.

The light is located on the bottom of the pen and turns on by pressing a small button.

Package includes:
1- Pen for writing invisible messages and built in UV light
1- Invisible ink refill
4- Button batteries.

Reference: ECOSFERASP

Name: Ecosphere self-sufficient Ecosystem in Oval shape 13cm glass

Price: 98 Euros

An EcoSphere is a working ecological system and its biological cycle represents a simple version of Earth s own ecosystem. While beautiful to look at, it demonstrates the delicate balance of a closed system like the Earth and contains some of the same essential elements that are found on our planet. The Earth is represented by the gravel at the bottom, (with) water filling approximately two-thirds of the system and air filling the balance of the space. Fire is represented by (the) light. And finally to complete the system, life the shrimp, the algae and the bacteria.

The EcoSphere is the result of technology developed at NASA s research laboratories. NASA scientists were researching self-contained communities for space explorers to live in during long-term space flights. And out of this work came the EcoSphere an ecosystem of animal and plant life in perfect balance with nature.

Each system comprises a clear soup of filtered seawater containing gravel and gorgonia (the non-living branch like material) together with some shrimp, algae and bacteria. Each is a key component of the ecosystem. The gravel, gorgonia and glass all provide surface areas to which the micro-organisms can attach themselves.

The EcoSphere works by gathering energy from the light and converting it biochemically. Light, together with the carbon dioxide in the water, enables the algae to produce oxygen by photosynthesis. The shrimp breathe the oxygen in the water and graze on the algae and the bacteria. The waste from the shrimp is broken down by the bacteria into nutrients, which in turn feed the algae. The shrimp and the bacteria also give off carbon dioxide and the cycle is renewed when the algae use this once again to produce oxygen. EcoSpheres need warmth as well as light to function correctly. Keeping the temperature fairly constant assists the long-term viability of the system.

Reference: ECOSFERASS

Name: Ecosphere a self-sufficient Ecosystem in a round 10cm glass

Price: 99 Euros

An EcoSphere is a working ecological system and its biological cycle represents a simple version of Earth s own ecosystem. While beautiful to look at, it demonstrates the delicate balance of a closed system like the Earth and contains some of the same essential elements that are found on our planet. The Earth is represented by the gravel at the bottom, (with) water filling approximately two-thirds of the system and air filling the balance of the space. Fire is represented by (the) light. And finally to complete the system, life the shrimp, the algae and the bacteria.

The EcoSphere is the result of technology developed at NASA s research laboratories. NASA scientists were researching self-contained communities for space explorers to live in during long-term space flights. And out of this work came the EcoSphere an ecosystem of animal and plant life in perfect balance with nature.

Each system comprises a clear soup of filtered seawater containing gravel and gorgonia (the non-living branch like material) together with some shrimp, algae and bacteria. Each is a key component of the ecosystem. The gravel, gorgonia and glass all provide surface areas to which the micro-organisms can attach themselves.

The EcoSphere works by gathering energy from the light and converting it biochemically. Light, together with the carbon dioxide in the water, enables the algae to produce oxygen by photosynthesis. The shrimp breathe the oxygen in the water and graze on the algae and the bacteria. The waste from the shrimp is broken down by the bacteria into nutrients, which in turn feed the algae. The shrimp and the bacteria also give off carbon dioxide and the cycle is renewed when the algae use this once again to produce oxygen. EcoSpheres need warmth as well as light to function correctly. Keeping the temperature fairly constant assists the long-term viability of the system.

The shrimp have reproduced in some systems, but this is rare. The algae and the bacteria reproduce continuously. Over time gradual changes may occur the oldest systems end up with the blue-green algae (the green algae having become exhausted) but this can still produce sufficient oxygen to sustain the shrimp. In this way the system goes through transitions, starting out quite clear, then changing to a slightly cloudy cast and eventually becoming clear again.

The average life of the small EcoSpheres is two to three years. The larger systems tend to last longer because they contain more shrimp. It is not possible to be precise about this because much depends on the differing light and temperature conditions each system experiences. The actual age of the shrimp is also unknown. Some EcoSpheres have lasted ten years or more.

The shrimp eat the algae and the bacteria. If you watch closely you will see them feeding. If the green algae is no longer visible, don t worry, there will still be plenty of other algae and bacteria for them to graze on. The pale translucent shrimp-like images sometimes seen lying on the bottom are exoskeletons, which are shed by the shrimp (shrimp are crustaceans which means their skeletons are on the outside rather than the inside and they soon grow a new one, which expands and hardens). Nothing goes to waste in an EcoSphere these are eaten by the shrimp and the bacteria.

Product specification:
Size: Small Round Ecosphere, 10 cm diamater, 0.5 Liters
Number of shrimps: 3-4

Reference: LED-CLOCK

Name: Remote control leds light projection message clock

Price: 59 Euros

Features:

It combines the time and alarm clock, date and your personalized messages which can be programmed using a remote control.
It can be used used a clock, calendar and a message box for the family
The message display can be used as a promotional message display or welcome board for your store.
As a digital world time clock and date of 12 major cities around the world: Hong Kong, Bangkok, New Delhi, Cairo, Paris, London, Sao Paolo, New York, Los Angeles, Honolulu, Sydney, Tokyo (one by one).
It is also a perfect gift for your friends and family. The receiver will have a surprise when they find the message displayed after opening the box!

Special Features:
Desktop or wall mounted options.
All functions can be set by remote control.
Programmable timepiece and calender.
It is a multi-function and purpose device for timer, alarm clock, calendar and personalized message display by moving LEDs.
It can display the date and time in 12 major cities around the world.
10 built-in messages which can be displayed auto-periodically.
User may create 9 sets of their own personalized messages and each message contains maximum 100 characters.
Whith flash animation colourful background.
AC/DC powe adapater
Can use 3 Alkaline "AAA" batteries for data memory (batteries not included)
Easy and safe operating.

Technical Specifications:
Display method :
From left to right/from right to left
From top to bottom/ From bottom to top
Go up and then rotate backwards
From both sides and move to center/From center and move to the sides

Display content:

Time : format 24 hours (00:00)
Date: DD:MM:YY
Day : Sunday/ Monday/ Tuesday/ Wednesday/ Thursday/ Friday/ Saturday
Message content: user can set the specific date for message displaying
Message setting: enter the required display "set message" right after the date is set for message display

Message Displaying:

Message will be displayed periodically and automatically with the pre-set date
If no message if set, the time and date will be displayed periodically.
If message is set, the message, time and date will be displayed periodically.
Built in messages included:
Content:
* Happy (set to display daily)
* Happy New year (set for 1st of January)
* Velentine! (set for 14th of February)
* Christamas Eve (set for December 24th)
* Merry
* Merry Christmas (set for December 25th)
* Boxing day (set for December 26th)

Reference: PROJ-CLOCK

Name: Desktop Projection Alarm Clock With Thermometer

Price: 29 Euros

Features:

Projects the time onto any surface in large, easy-to read, blue digits
With snooze alarm function
Rotate lens to project the time wherever you want
With continuous projection function
Power: works on 3 pieces "AAA" alkaline batteries (not included) or DC 4.5V adaptor (not included)
Body Color: Translucent blue with sliver for blue projection digits
LCD with Blue backlight shows 12/24 hour time, alarm time, month, date, day, year and F°/C° temperature

Reference: LED-CARD

Name: Led card with personalised text

Price: 29 Euros

Now you can advertise your business face-to-face at trade shows, conferences, events, meetings, and parties. The LED badge does the hard part for you by breaking the ice. People will be drawn in by the glowing messages as they scroll on your shirt.

Features:
Slim & small design
Data communication: easily input by hand
LED: 19 x 5 dot matrix
Product dimensions: 80mm x 42mm x 3mm
Display led window dimensions: 71mm X 15mm
Color of LED: red
Power: Runs on 1 CR2032 3V Lithium Battery (package comes with 2)
Slim design - and MAGNETIZED on back (metal plate detaches - strong magnets are underneath, sealed into the unit. Holds easily through shirt or placard)
Operation time: about 20 hours
With 9 levels of speed to display, and 9 levels of luminance for adjust by user
Weight: 10g
Badge can store 6 messages (1 can store 512characters, 2-6 can store 256 characters). Only one message can be displayed at a time

Type whatever message you would like to see the badge display by using the demo on the left. After you finish typing your message press the send button to play your message..

Reference: KEY-FINDER

Name: Keyfinder Keyring with sound and flashing light

Price: 5 Euros

The sonic key finder ends hours of hopelessly searching for your keys. All you need to do is clap, whistle or shout.Any loud noise causes the key finder to beep and the light to flash. Also handy for finding keyholes.

Features:
Light: helps to find keyhole when it is dark
Attach keys to key chain
When you lose your keys, just whistle to find them
The key finder will emit a high pitched noise
Blister packed, includes two replaceable batteries
Product size: 5 X 3.5 X 1.2cm

Reference: SEP-ALARM

Name: Tracking and separating alarm for your personal effects

Price: 24 Euros

You no longer have to worry about your phone, wallet, keys, bag, handbag, etc.. now you can find your accessories in a matter of seconds!

Alarm turns on when transmitter and receiver are separated. Alarm turns off when transmitter and receiver are connected
Mini design; can be easily put into wallets or pockets
Quick and safe: receiver produces a beep sound and vibrates immediately when transmitter part is beyond the receiving range (approximately 15 meters). Once the receiver is closer to the transmitter the vibrating stops.

Keep your personal belongings within reach.

Ideal for:
- pet wandering alert.
- mobile phone alert.
- suitcase & luggage alert.
- wallet alert.
- And many many more usages!

Characteristics:

Transmitter:
- size: 44 (H) X 28 (W) X 8 (D) mm
- Weight: 9.3 grams
- Battery: CR2032 (x1)

Receiver:
- Size: 60 (H) X 36 (W) X15 (D) mm
- Weight: 28.0 grams
- Battery: AAA Battery (X1)

Range:
- Up to 15 meters

Battery life:
- Receiver: approximate. 1 month
- Transmitter: approximate. 1 month.

Instructions:
* Place a AAA Battery on the receiver
* Switch the power supply of the Transmitter to "on". You will notice that the light will twinkle this is because it is sending out a signal.
* Turn the receiver on to N ON . It will beep several times. After a short period it will beep two times , this indicates the successful coding study of the transmitter.
* Transmitter should be attached to the object being protected.
* Adjust the distance debugger of the receiver to a suitable distance. Move the distance debugger (round lever) from down to up to adjust the distance from near to far and vice versa.
* Receiver should be attached to the owner.
* When the object being protected goes further than the set distance and you hear the alarm, switch the power supply to "S-ON" At this point the motor starts to vibrate. It stops vibrating and beeps similar to the indicating sound when it comes near the object. This way your objects are always protected!

Reference: GLOW-RING

Name: Vibrating Glow in the dark condom ring ViCon

Price: 7 Euros

This vibrating glow in the dark condom ring will turn any condom into a thrilling vibrator! It has the added bonus of glowing in the darks, so its double the fun! It is designed to fit securely at the base of the condom, emitting strong vibrations that provide exciting stimulation for both partners.

Powered by an ultra light battery that is safely enclosed in a soft silicone shell, the vibrating condom ring can run up to 25 minutes.

As an added bonus, the vibrating condom ring also helps maintain a strong erection.

Slide the ring over an erect penis until it reaches the base of the penis. The protruding point is designed to face upwards to stimulate a woman's sensitive areas. Gently trigger the on/off switch to experience vibrating fun during sexual intercourse.

Recommended for one-time use only.

Each ring is sterilized and vacuum packaged.

Reference: LASERPOD
Name: Fantastic Laser Light Lamp - Laserpod
Price: 98 Euros

Using the latest in laser, LED (light emitting diodes) and crystal optics, Laserpod brings science and nature together to create ever-changing organic light forms of profound beauty.

Laserpod is one of the most innovative lighting products since the lavalamp of the sixties, simple in principal, Laserpod actually uses super advanced technology to generate the purest light known to man.

It is the patented invention of the innovative UK light artist Chris Levine, whose varied and ground breaking work in light has ranged from light sculptures for the band Massive Attack and some of the most leading edge fashion designers, to an historic hologram portrait of the Queen of England. His work is about the experience of seeing and the living power of light, an ethos that is distilled into Laserpod.

Laserpod uses three electronic lasers and three blue and purple LED's, chosen so that the combination of their wavelengths work as a background to the red laser to give a super sensory experience.

This intense light energy is projected through a crystal and the output of this wondrous device can be described as awe inspiring!

With the diffusers on top of the alloy cylinder, as supplied in the package, the effects are contained and Laserpod becomes a soothing ambient lamp.

The visual images start when the diffusers are removed-the light forms will radiate and project across an entire room and over great distances.

You can interact with Laserpod by placing anything optical on top of the unit, glass, crystal or clear plastics will all produce the most profoundly beautiful effects.

For the best Laserpod experience, the device should be activated in complete darkness when the more meditative and organic beams will be seen- these are extraordinary and are quite unique to Laserpod.

Laserpod is portable and can function for up to 8 hours on three AA batteries or run directly from mains on the powerpack.

Photography and video will not do justice and nothing can compare to the experience of seeing it perform live!
A revolution has started. Feel the Light.

Reference: LED-CLIP
Name: PiX Multi-Functional Sport LED Clip
Price: 38 Euros

A mobile display accessory, designed to be more than just a simple display. Pix Sports is a clock, a stopwatch, a pedometer, a signal, a motion responsive display, and even a scrolling message display. Users can flash dynamic icons or personal text messages, or utilize it as a motion responsive display.

The clip will let you stick PIX Sports on almost anything. Take the clip off and you can even fix it to a string and wear it as a necklace or attach it to your backpack. It only uses 2 buttons (marked A and B) to give you access to all of the PIX's features. Whatever feature you are using, you'll have access to 75 high intensity LEDs all in a convenient 3" by 1" form factor.

Features:

The Counter acts just like a pedometer, by counting the frequency of movement when attached to a pocket, or even your boot laces!

PiX Sports can display a Message of up to 30 characters in a scrolling display - such as your name, URL, phone number, e-mail address, company name etc..

In Watch mode, Pix Sports displays the current time

The stopwatch function measures time lapse to 0.1sec accuracy

Signal mode displays a signal chosen from your choice of 10 animated patterns

In Motion Responsive Display model, a pattern changes in proportional to the frequency of body motion - great for clubbing

Naturally to cope with the great British weather, PiX Sports is splash-proof to cope with outdoor activities!

Specifications:
Size: 3 X 1 X 0.5in
Weight: 0.8oz (including batteries & clip)
Display: 15 X 5 matrix high luminous intensity LED
Power: 2 x 3V CR2032 Lithium battery (included)
Run time: over 70 hours (all LED constant running)
Included accessories: Belt clip and screw, User manual

Important note: To turn PiX Multi-Functional Sports Clip off completely, batteries should be removed as the batteries are also consumed in power saving mode.

3) Power supply: one CR2032 battery

4) Can store 6 messages: one with 512 characters and five with 256 characters

5) Nine speed levels

6) Led: 21 x 7 dot matrix

Type whatever message you would like to see the badge display by using the demo on the left. After you finish typing your message press the send button to play your message..

Reference: DRIVEALERT

Name: Anti-drowsy alarm for drivers

Price: 23 Euros

The Driver Alert is an anti-drowsy alarm designed to raise drivers awareness of momentary lapses caused by sleepiness and tirendness. Wear behind the right ear it works on the principle of electronic balance. As the driver head nods below a preset angle it emits a loud alarm signal alerting the driver to take corrective action, take a break or even take a nap!. The driver alert device is not only designed for drivers, it is perfect for people who need to be on full alert while on duty such a security guards guards, machine operators, and even students who need to work on their posture.

Instructions:

On the device is a little lever switch, shift it to the right towards ON

Test that it is working properly by tilting it forward, if it beeps then it is at working mode

Place behind your right ear and adjust, it should be placed correctly for effectiveness. Your head should not nod more than 30 degrees (the less the better), before it beeps

When the device is no longer required move the lever towards the word OFF

Reference: SHAKETORCH

Name: Shake Torch Faraday Star without batteries

Price: 29 Euros

Forever Flashlight uses no batteries and requires only the single, included LED. Leave it unused in your car's glove box for years with complete peace of mind-you'll get that all important light when you need it.

Forever Flashlight pays for itself quickly by saving you the cost of the batteries required to keep a standard flashlight in working order.

How the Forever Flashlight Works: English physicist Michael Faraday discovered that any change in the magnetic environment of a coil will "induce" voltage in that coil. Forever Flashlight makes use of Faraday's Law of Induction to give you a lifetime of light without batteries replacement LED's or maintenance worries. The math used in Faraday's formula may be a bit challenging, but the Forever Flashlight makes it all simple-shake it and slide on the switch to get a dependable light every time!

Instructions:
Simply, shake the the Faraday Star flashlight for 30 seconds and you will have enough light to last you 5 minutes

Characteristics
Light is visible from 1km away

It does not require batteries or light bulb.

shock resistant and water resistant

Floats on water

DimensionsSize: 3 x 15 x 3cm (1.2 x 5.9 x 1.2")

Reference: LED-TORCH

Name: Small Silvered colored single white Led Torch key ring

Price: 8 Euros

A silvered colored very stylish, powerful , light weight one led torch keyring.

Reference: HOVERCRAFT

Name: Remote control Hovercraft

Price: 126 Euros

Ever driven a RC car through a puddle and wished you hadn t?

Ever wished that your RC boat would work on land?

Well if you have and even if you haven t, - everyone s a winner with a Hovercraft!

This R/C hovercraft is equally at home on land or water. Be it your living room or office floor or the local pond or river, this bad boy speeds across them all! The hovercraft is an all year round product, not restricted in the way RC boats are to weather conditions. If it s a nice day, down the local pond/lake. If its pouring down race around the house. If its snowing, that depends. If you can brave the cold this baby will glide across snow and ice with ease.

3 powerful fans propel this funky hovercraft to the amazement of onlookers.

Floating on a cushion of air you have full control via the transmitter included. Operating to a distance of 50 feet(aprox. 15.24 meters) and at speeds up to 10mph (aprox. 16kms/hr)!

Available in different designs and frequencies racing is also an option just watch out for ducks!!!.

Each hovercraft comes compete and ready to run with rechargeable battery included. They run for about 15mins then a simple recharge is required, then it s ready to go.

Not suitable for rough water.

Nokia Tool all releases
NetMonitor 1.0

Note: Any use you make of service software and its consequences is entirely your own responsibility. Service software NOT supplied

Reference: SOFT-CDLM

Name: LogoManager CD and license

Price: 38 Euros

Logomanager unlocks the power of Nokia phone and it allows you to design your own personal logos and ringtones.

Simply hook up your PC and Nokia phone via cable or infrared, and use LogoManager to truly customise your phone quickly and easily - and it is absolutely FREE.

Caracteristics:
You can create your own start up logos:
Identify with your phone as soon as it starts up. You can capture a photo, any picture from the internet or design your own.
You can change opertator logos:
Personalise your phone with a unique logo instead of the standard operator name.
Screensavers:
Customise your static screensavers for when the phone is not in use, and create animations for the 3330 and 3410.
Ringtones:
Add original ringtones to your phone so that it sounds like no one else's.
Picture messages:
Make your picture messages better than the rest.
Organise your phone book:
Add, delete or modify your phonebook entries and caller groups/graphics. No more worries if you lose or update your mobile, just save a back-up of the SIM card and phone contents to transfer to a new Nokia phone. You can also export your entire phonebook to a spreadsheet package for safe keeping and easy use.
Send via SMS to your friends:
As well as customising your own phone, you can send text, logos and ringtones to your friends' Nokia phones by SMS.

Compatible phones:
3210, 3310, 3330, 3390, 3395, 3410, 3510, 5210, 6110, 6150, 6190, 7110, 7190, 6210, 6310/i, 6250, 8210, 8290, 8310, 8850, 8910. You only need a cable or an infrared adapter.

System requirements:
Desktop PC running Windows Operating System.
16Mb RAM.
Compatible Nokia phone.
Cable/infrared connection to phone.

The box includes:
LogoManager software CD.
Instruction booklet.
Registration card.

Reference: NK-FLASH2

Reference: MOT-T19X

Name: Motorola T191 Serial data cable

Price: 14 Euros

Data cable to unlock service provider of latest motorola mobile phone models T191. It has been tested with DMTOOLS.

Reference: EMMI-DROID

Name: Motorola EMMI-BOX version 2.0 include xx.13.xx

Price: 240 Euros

Now some operators companies include a new version of FLASH, it's the xx.13.xx, and old EMMI boxes don't work if you find a phone with this flash version and maybe sometimes you can break your phone (this box can repair this failure too).

Features:

Unlock any Motorola phone including flash version xx.13.xx
Change languages
Change logos
Change ringtones
Fix tampered motorola phones or bad unlocked
Repair Motorola phones It includes Motorola EMMI box + CD with all necessary programs, EMMIDROID.

Emmidroid is a Hard / Soft set that allows you to connect a motorola mobile phone based on DCS_BUS to the PC.
This hardware is known as EMMI-BOX EMMIBOX (Electric Man-Machine Interface).
Emmidroid works with an standard 9Volts battery.
It doesn't need any external power adaptor, that allows a better independence to work with laptops.
Emidroid V2.3 allows to unlocj any Motorola phone based on DCS_BUS , including xx.13.xx versiones
THe new motorola phones T191,T192,T193 y V66, cannot be unlocked at this moment.
But we are working to offer an update in the next version of software and to provide appropiate connectors.
There are two big groups of motorola phones, depending on CPY model that they use:
Motorola Phone based on 68000 CPU, by example:
7500, 6200, CD920,CD930,CD928, L2000, CD520, D170, D160, M3588, STARTAC, T250 , etc.
Motorola Phones based on Arm CPU, by example:
V3688, V2288, V8088, T2288, V50, V100, V66

With Emidroid V2.3 is possible to dump and read the full flash of any Motorola Phone and save as a .bin file.
You can Dump ROM of this phones using EMMI-DROID at 1Mbyte by 2.5 minutes, against of Motokey of Zulea that takes 75 Minutes every 1 Mbyte.

You can also edit phone numbers / contact directory and send SMS messages easy. This has been our latest development and research, and it's designed on SMD with more reliability, you can take it on your poket everywhere.
To install it you only need to connect your phone with the cable, go to windows and select control panel->Add new hardware and windows will find a new modem, you can select standard 19200 bps Modem driver for directly dialup modem.

Reference: SO-DTCZ

Name: Data Cable for Sony CMD-Z5/CMD-Z18

Price: 9 Euros

The data cable SO-CZ5 works with Sony models CMD-Z5 and CMD-Z18 for data transmission. The main advantage of this cable is that you can activate the built-in Data Capability within mobile phone for FAX/DATA call. You can also edit your phone book numbers, contact directory and send SMS messages easily.

Reference: SO-CZ

Name: Data Cable for Sony C5/Z5/Z18

Price: 9 Euros

The data cable SO-CZ5 works with Sony models C5, Z5 and Z18 in service mode to unlock or repair the phone.

Reference: SO-J5

Name: Sony CMD J5, J6, J7, J70, Z7, Z70 data cable

Price: 9 Euros

This cable works in service mode with Sony CMD J5, J6, J7, J70, Z7 and Z70 and compatibles.

Reference: EPM-PROG

Name: SMD EEPROM pony programmer with SOIC Clips

Price: 60 Euros

With this programmer you can unlock / repair mobile phones to which cables are not available or you have to program your EEPROM. You will need this cable to repair / unlock mobile phones:
Acer, AEG, Alcatel, Aselsan, Audiovox, Benefon, Dancall, Ericsson, Maxon, Mitsubishi Savvy Monoband, Nokia, Panasonic, Phillips, Sagem, Samsung, Siemens, Sony and Telital.
You will need open your mobile phone, but you don't need to desold eeprom from the motherboard, EPM-PROG is built with a SOIC clips that fit to your EEPROM phone to read and write.
The procedure is easy, when you read eeprom you should use FREE EEprom 2000 (available at our members area) it will apply a patch to your mobile phone EEPROM memory, and then you must write EEPROM in the phone.
To read or write EPROM to your mobile phone you must use ponyprog
These EEPROM programmer clips are required to flash fully a Nokia phone, since with NK-FLASH we can reprogram Nokia Flash but it is necessary to reprogram EEPROM too, if you don't reprogram EEPROM your mobile phone could lose coverage.

Main Applications of this product are:

Security code reset in 70 % of mobile phones
Unlocking in 70% of mobiles phones
IMEI change in 20 % of phones
Security code reset in 30 % of car radios
Password retrival in 60 % of laptops
DVD region changing
You can read/write EPROM at any device without desoldering without problems.

Reference: LG-3IN1

Name: LG data cable LG1200, LG600 and LG510

Price: 29 Euros

First in the world most compact Unlocking clip! Its small, light weight and easy to use.

Features:
Removes simlock on all known software versions
Unlocks in seconds
No external battery needed
Completely portable
Quick & easy to use

Instructions:

- Phone must be turned off
- Connect clip to phone
- Turn phone on
- Wait for the led on the clip to blink and turn off
- phone is now unlocked!

Reference: DCT4DIRECT

Name: DCT4 Direct Box for repairing IMEI on Nokia phones

Price: 600 Euros

This is the first standalone software that can repair IMEI/ESN number of a Nokia DCT4 phones to any digit without UEM change.

This software allows you to:
- Repair IMEI on DCT4 phones without opening the phone (UEM Change)

About DCT4 Direct Software:
- Works on Window XP
- Future updates and support
- Real USB data transfer between PC and Phone
- Best Quality phone Cables and Software

How its works:
On all Nokia DCT4 phones the important security data for the IMEI and ESN is stored on a special, not rewritable chip inside the phone: the UEM chip. This chips characteristic is that it is only one time programmable (OTP) and that the data inside cannot be rewritten. Because of this, until now it was only possible, to repair the IMEI/ESN if you change this UEM chip. Since this task requires a lot of time and effort, a lot of customers were looking for an easier solution, without the need to open the phone and change some components inside. And after some time finally somebody created a tool that was able to do all that operations without changing the UEM chip: the DCT4 DIRECT Box. This software uses a special technique in order to make it possible to repair the IMEI/ESN without changing any data on the UEM chip it self. This task is done by editing the MCU Firmware inside the phone and writing the desired IMEI/ESN data to the FLASH, not to the UEM chip, this procedure is also known as FLASH PATCHING. After the phone has been updated with the patched flash data by the DCT4 DIRECT BOX the phone will have the new IMEI/ESN number and all simlock data rebuild as well. This might sound a little bit complicated now, but in fact the user is not affected in any way by this procedure. All the user need to do is to type the desired IMEI/ESN number into a field and then just press one button for starting the IMEI/ESN repair.

Support phone models:
DCT4 Direct (v1.0.0.32):

- RH-27 - 6225, v H190V0800.nep
- RH-50 - 3100b, v 4.03

Note:
The Supported Phones above marked with Star (*) sign do not operate properly with this version. Do not use them. In case you do and have a dead phone, just reflash the MCU to repair it (1100 - MCU+PPM).

IMPORTANT:

*** Please note that the DCT4 DIRECT BOX cannot work with phones that:**
- Have bad UEM data (30 sec off problem)
- Don't have any UEM data at all (?????????????? IMEI/ESN)
- Have Software/Hardware problems
- Please always check if phone is in full working condition before starting the IMEI/ESN repair procedure.
- If you want to bring the phone back to its original state, then you only need to flash the phone with original MCU software. After MUC software update the patch will be erased and the phone will operate as before.
- IMEI changing is illegal in some countries. All procedures you might accomplish with this box are full responsibility of the user, not the supplier.

Package Contains:

Reference: HWK-MODULE

Name: HWK Module for UFS/TWISTER/TORNADO

Price: 150 Euros

Reference: BB5-VPP

Name: Nokia BB5 phone VPP adapter for UFS/HWK/N-BOX/TWISTER

Price: 29 Euros

For switching the 9V of BB5 over sarasbox (e.g, N-BOX,UFSTORNADO ,TWISTER , incl clone twisters) & UFSx HWK

Reference: XPERIENCE

Name: Xperience a multiflashing, unlocking and repairing box

Price: 398 Euros

XperienceBox is a professional service box which supports all Motorola mobile Phones Protocol (Serial, USB, DSC and JTAG) working with a wide range of mobile phone models (more to add by upgrades).

XperienceBox works as Standalone, Unlocking (SP & SIM & Phone lock, Security & User Code) and Flashing up to 2 Mb/sec* (using MMC by expandable port or PC mastered) .

Main Features:
- USB connection to PC. Gains from USB speed (Up to 2 Mb/sec*). No LPT or Serial Connection between device and PC needed.
- Working under Windows 98/ME/2000/XP without need of special configuration. USB 2.0 communication supported.
- Unlocking (SP & SIM & Phone lock, Security & User Code), Language Changing, De-branding, Upgrading and Software Faults Repairing.
- Fully upgradable Universal Standalone Multi flashing Device.
- Working as a Standalone (flashing/unlocking) or Pc Mastered.
- Expandable via Expander port, allowing hardware reconfiguration and upgrades.
- Delivers easy access to platform function via LCD display, keypad and buzzer. No special technical knowledge required.
- Supports all mobile Phones Protocol: Serial, USB, DSC and JTAG.
- Supports real Multi flashing for USB Mobiles (for all mobile´s full bandwidth) via Expander port.
- Supports Mobiles flashing from PC (via USB) or Standalone for ergonomic and portability (via Multi Media Card - MMC). Revolutionary: NOW YOU CAN USE " CLIP MODE" FOR FLASHING PHONES, same for unlocking functions.
- Supports Mobile Flashing Reading via USB. Probably the fastest Flashing Mobile service Box available in the market.
- Easy and powerful Phone Backup functions keeps your original phone-flash and user settings safe.
- Power from Battery (internal) or AC adapter (external).
- Real time support included in PC Software. Web support via web page: www.xperiencebox.com or http://forum.xperiencebox.com.

* Flashing speed depends on the hardware type of the phone.

Compatible with (more models will be added thru updates):
Motorola old models (working with BIC43E08)
Motorola Cxxx
Motorola Exxx
Motorola Vxxx
Motorola Txxx
Motorola Axxx

XPerience Box:
Dimensions (L x W x H) : 21cm x 10.5cm x 4cm
Phone cable type: USB & RJ45
Expandable port : MMC & Expansion port
Power : (not included) DC 9V, 50 mA & 9V Battery

Features:

Supports New RSA Protected Models

Old Models Also Supported Inc T28 etc..

Unlocks in 5 Seconds

Retest User Code to default

Easy to use

Portable Clip

No PC Or Battery Required !!!

Has A Counter To Count How Many Phones Have Been Unlocked !!!

Instructions:

Remove Sim Card from phone, and power off the phone before connecting it to the clip.

The blue LED will blink one long and one short period of time.

Wait for blue LED to light a third time for a longer period of time.

After this you can disconnect your phone and it is unlocked.

Unlock Counter:
If you wait for 15 seconds after an unlock, the clip will display how many SonyEricsson phones you have unlocked with the clip so far.

How to see the number of phones unlocked

Blue & Red LED = 1

Red LED = 10

Blue LED = 100
For example: Red LED blink once & both LED blink twice = 12 phones unlocked

Package Contains:

X-Nemesis Clip

Update Cable

Reference: EXCALIBUR

Name: Tornado flashing and unlocking box with Excalibur connectors

Price: 500 Euros

Reset joystick counter.

Enable/disable channel info, battery info, SIM toolkit support, SMS capability.

COMPLETE SE FIGHTER FUNCTIONALITY INCLUDED!

NOTE: Software works only under XP

Update history:

Version 2.20 (23rd January 2005, beta version):
Fixed an issue with red Z500 RSA unlocking.
Updated TAC list for red Z500a and for T637.
It is no more necessary to specify that S700/S710 is about to be attached.
S700/S710 can be flashed at the rate of 921600Bd with DSS20 and DSS25 deskstands.
Introduced an option to upload audio files, video files, pictures and themes. Files are placed to the correct phone folder automatically.
Fixed a bug in CDA article/version modification code.
Added an option to change default article and default version strings.
Fixed a bug causing occasional access violations on Control Window close.

Version 2.10 (17th January 2005):
Boot code modified again.
Fixed small bug in GDFS and file system access code.

Version 2.00 (12th January 2005, gamma version):
Fixed few bugs in boot code.
Added an option to disable phone configuration analysis.
Simplified phone type selection options.

Version 2.00 (12th January 2005, beta version):
Boot process optimized.
Fixed a minor bug when booting S7xx phones with phone type autodetection turned off.
RSA unlocking routine optimized. It works also for Z1010 and V800 of any color.
Added languagepack change for Z1010 and V800 phones.
Added support for older GDFS format.
Fixed a minor bug in GDFS access code.
Added automatic GDFS configuration mismatch detection.
Added support for K300, T687 and Z500 phones.
Added reading unlocking/relocking network codes from K300, T687, Z1010, V800, S710 and Z500.
Added support for conversion from T230 to T290.
Codes read from RSA-based phones are now stored into a log file (placed into the Data folder).
Added the possibility to specify communication rate for Z500.
About-box information updated.
Updated TAC list for K700i.

Features to be added soon:
Repairing phones with completely destroyed security zone in case you have no backup.

Emptyboard programming (IMEI filling, OTP area programming, RSA certificate upload...)

Backup/restore/copy GDFS calibration zones.

Full phone memory backup/restore.

Package contains

Cruiser Dongle HASP ORIGINAL

1x data cable

warranty

For Cruiser there are two options of keys - depends on stock cuetomer will recived one of above dongle shown on picture below

Warranty
For this product we offer 12 months of warranty

Reference: MARTECH-II

Reference: SACODEREAD

Name: Sagem Code Reader vers. 14 by TestPoint

Price: 180 Euros

Sagem Code Reader v.14 is the first software in the WORLD which is able to read simlock code from ALL Sagem phones (no matter SW version in the phone) in just few seconds.

Witth the supported phones:
My-X6 ALL VERSION
MY-X1 ALL VERSION
MY-X2 ALL VERSION
My-X5 ALL VERSION
My-X5m ALL VERSION (old and new board)
My-X5d ALL VERSION (old and new board)
My-X3 ALL VERSION
My-X3d ALL VERSION (old and new board)
MW-3026 Load-A-Game ALL VERSION
MC - 9xx ALL VERSION
MW - 9xx ALL VERSION
MY - 302x ALL VERSION
MW - 302x ALL VERSION
MY - 3036 ALL VERSION

Information:
For reading unlock code from your phone or reset phone code you must open phone and connect 4 cables to Test Points in phone. Test Points are huge so even amateur can do this. After connecting to Test Point you may read code by just 5 seconds.
It's the only method for unlock these models in the WORLD since new phones don't use FIELDS anymore that are used for calculating code by BruteForce method. Difference beetwen other software is that this software reads code does not calculate it. That's why reading process takes only few seconds.

remark:
if some occasional fail on using the MYX5 at MX-5 in the screenshot, pls try with MX-1.
You will need to download Sagem Code Reader vers. 14 by TestPoint Software

Reference: V-CLIP

Name: Motorola V-Clip GOLD - UPGRADED

Price: 198 Euros

Unlocks in seconds Motorola V300, V303, V400, V500, V525 and V600, absolutely no PC is required.

Reference: EMMI-DROID

Name: Motorola EMMI-BOX version 2.0 include xx.13.xx

Price: 240 Euros

Now some operators companies include a new version of FLASH, it's the xx.13.xx, and old EMMI boxes don't work if you find a phone with this flash version and maybe sometimes you can break your phone (this box can repair this failure too).

Features:

Unlock any Motorola phone including flash version xx.13.xx
Change languages
Change logos
Change ringtones
Fix tampered motorola phones or bad unlocked
Repair Motorola phones It includes Motorola EMMI box + CD with all necessary programs, EMMIDROID.

Emmidroid is a Hard / Soft set that allows you to connect a motorola mobile phone based on DCS_BUS to the PC.
This hardware is known as EMMI-BOX EMMIBOX (Electric Man-Machine Interface).
Emmidroid works with an standard 9Volts battery.
It doesn't need any external power adaptor, that allows a better independence to work with laptops.
Emidroid V2.3 allows to unlocj any Motorola phone based on DCS_BUS , including xx.13.xx versiones
THe new motorola phones T191,T192,T193 y V66, cannot be unlocked at this moment.
But we are working to offer an update in the next version of software and to provide appropiate connectors.
There are two big groups of motorola phones, depending on CPY model that they use:
Motorola Phone based on 68000 CPU, by example:
7500, 6200, CD920,CD930,CD928, L2000, CD520, D170, D160, M3588, STARTAC, T250 , etc.
Motorola Phones based on Arm CPU, by example:
V3688, V2288, V8088, T2288, V50, V100, V66

With Emidroid V2.3 is possible to dump and read the full flash of any Motorola Phone and save as a .bin file.
You can Dump ROM of this phones using EMMI-DROID at 1Mbyte by 2.5 minutes, against of Motokey of Zulea that takes 75 Minutes every 1 Mbyte.
You can load flex files that have phone configurations, logos, ringtones, phonebook ,etc) on any phone.
Actual version allows FLASHING phones based on CPU 68000 and V3688 based on ARM CPU.

A software update will be available very soon to allow you to flash any Motorola Phone with ARM CPU too.

EMMI-DROID allows to repair broken phones by wrong flashing, allowing to fix phones that never can be turned on.

Our EMMI-DROID equipment implements the full DCS protocol including 3 layers, and allowing synchronizing and retry when occurs frame errors, this offer you the security to unlock any Motorola phone always without any risk.
Other roemmis and clips implementation in the market do not implement DCS protocol, they only send some messages to the mobile phone, without analysing answer messages from the mobile phone

Download latest version from: http://ucables.com/download
You can download documentation in pdf format at our download area More info at: emidroid.com

Reference: DEJAN-BOX

Reference: ACT-IR220L
Name: PC Serial IrDA Adapter ACT-IR220L+
Price: 57 Euros

Reference: MA-620

Name: MA-620 USB Infrared Adapter

Price: 81 Euros

- Connectivity between desktop PC and mobile phone/PDAs

MA620 USB Infrared Adapter is a software and hardware 2-in-1 package that enables desktop users to do wireless BI-way data transmissions to infrared-equipped mobile phones, PDA, Palm Pilots, notebook PCs, and Windows CE machines.

Functions The MA620 USB Infrared Adapter package comes with Handset Manager, allowing a user to access, edit, and personalize their phone book, calendar, SMS messages for the convenience of business, communication, and fun.

Moreover, the software allows a user to manage data in their native languages, because the current version of Handset Manager supports over 10 languages including Arabic, Chinese (Taiwan), Chinese (China), Czech and Slavic Languages, German, Dutch, English, French, Italian, Russian, Spanish.

Handset Manager features: Phone Book Editor Manage your phone book the easy way with the Handset Manger phone book function. With the MA-620, you can save time, by adding entries and changing your numbers on your PC instead! Import and Export your phone book contents to and from contact manager software such as Outlook/Outlook express or Palm Software, via CSV file format. Edit and update into your phone via the phone book editor. Add or delete numbers, change their position, switch them between SIM and phone storage - then upload them back to your phone! Keep a back-up of your contacts on your PC.

SMS Editor

Send text messages by simply composing them on your computer and sending them through your phone! Compose a message on your PC and then send it via your phone. The multiple destination SMS send function makes sending to more than one number easy! Compose a new ringtone or logo and then send it as a message! Keep a back-up of your contacts on your PC.

Logo & Graphic Message Designer

The Logo Editor comes with the standard drawing tools, leaving you to concentrate on designing the coolest Logos around. New enhanced features allow you to view full-colour photo's and transform them into logo's effortlessly. Re-size and touch up and see instantly on your screen. Upload all the logos you find in the Internet. Change the Operator Logo. The MA-620 comes with 700 FREE picture logos! Design new Caller Group Graphics. Create new Picture Messages and send them to your friends. Replace the Startup Logo with one of your own. Import common Logo file formats, including Windows .bmp files, jpeg,png,ico,pcx and tga. Upload/download pictures to your Nokia 7650 & Ericsson T68/T68i (including Communicam pictures).
NOTE: the logo function is not available for Motorola phones. On Ericsson and Siemens phones only the operator logo function is available.

Ringtone Composer

The new polyphonic Ringtone Editor makes composing Ringtones fun, quick and easy with up to 16 tracks and 128 instuments - but if you lack creative talent, you can load in standard MIDI files and RTTTL Nokring files. Click and place musical notes, or change the tempo, add musical rests, flats and sharps. The MA-620 comes with 500 FREE Ringtones!. There's also a preview function, so your can hear your tune before uploading it to your mobile. Ringtones can be saved to the mobile phone, or you can even send your new hit ringtone by SMS to your friends.
Calendar Manager

Available for compatible mobile phones - make sure that you're always on time and up to date with the calendar support function! Synchronize your calendar with Microsoft Outlook. Edit and Manage your calendar on your PC then upload it back to your phone! Organize your calendar or change your schedule. Make full use of your phones organizer features!
NOTE: Handset Manager does not currently support the Phone Book synchronization of Outlook with the Siemens and Motorola phones.
Internet Surf the Internet and check your e-mail using your phone's Modem. If your phone has a hardware modem, utilize the modem and connect to the Internet or send and receive faxes. The Infrared link supports all IrDA modem drivers.

Please note:
Some functions may not activate if not supported by the mobile phone. Please check each product page to find out the detailed support INFO.

Can also be used as a conferencing system.

CAR-BABY USER'S MANUAL

1. HOW TO INSTALL
Clip the unit onto the speaker part of your phone set.
Place the phone set on the Phone Holder (option) or other convenient place in your car. Important: Keep within 1 meter between the driver and this unit, as the speaker party is talking from the Internal Mic of the phone set).

2. HOW TO USE
Tune the Car Radio to the right station (Frequency as shown on this packaging).
Switch on the power and the LED will be on.
Switch off the power after conversation to avoid the battery being driven off.
Please slightly tune frequency of the radio station if any slight cacophony is heard.
NOTE: Although the frequency is occupied by a radion station, this won't be heard when conversation begins.

3. TROUBLE SHOOTING
Decrease the volume of your Car Radio or your phone set to avoid heavy Echo.
Replace the internal battery in case of heavy cacophony or a shorter distance reception.

4. HOW TO REPLACE THE BATTERY
Push the clip at the bottom to open the battery cover.
Put the cell into the battery case.
Rebound the battery cover.

Reference: UNI-HFKCAR

Name: Universal Car Hands free kit

Price: 30 Euros

This special hands free kits fits to any mobile phone. It can be installed easily without need to sold cables and without unmount parts.

Reference: DUAL-SIM

Name: Universal dual sim card for all phone models

Price: 29 Euros

Brand new style dual sim compatible with GSM phone models. With this new design you no longer have to turn off your phone to change between numbers, change the look of your phone with a thicker housing or enter pins to change lines. With this new desing you can do all the switching directly from the main menu of the phone.

Features

1) Ultra slim design to keep original shape of the sim card, no need cutting original sim card

2) Compatible with all GSM mobile phone models. (For the Nokia 6230/6230i not compatible with version 5.x or higher)

3) Easy installation with great convenience

4) Original imported ultra slim IC and FPC board with sound and stable quality

5) Switch between phone lines from the phone´s menu. No need to turn off phone (optional).

6) No data loss for some phone when switching between 2 numbers or turning off.

Instructions:

Replace the yellow card with one sim card (pay attention to the direction of the sim) (SIM 2)

Remove the blue cardboard from the PBC making sure the protection slip is also removed. Note, there will be a sticky part on near the pins. Stick the original sim making sure it is contacting with the pins of the pbc board.

Stick "sim 1 " onto the card holder (important note: SIM 2 with stainless stell cover can not be inserted into the card holder)

Place battery back on, power on.

You will note on your main menu a new option of "dual sim" . You can use this menu to switch between cards. Do not choose "both on line" option as this will reset the sim card, this option is not compatible with European models.

Important note:
Make sure there is enough space between casing and/or battery to place the other sim card. One sim card is inserted in the simcard slot of your mobile phone and the other can be folded to be held between your back casing and the battery, but you need to make sure such space is enough for the sim to fit there. If your phone is too slim, you might not be able to fit the sim.

Phone MUST be unlocked.

DUAL-SIM not compatible with 64K sim cards and 3G sim cards

Reference: CAR-BABY

Name: Carbaby mobile phone handsfree

Price: 24 Euros

No wires!
No plug-ins!
No installation required!
CarBabyTM is truly universal, transforming your cell phone into a speakerphone everywhere. Dual band! Use either FM stations 88.7 or 106.5.
Easy to set-up.
Crystal clear sound with great sound quality. CarBabyTM takes advantage of your car speaker system.
Elegant, sleek design that is portable and easy to transport from one car to another, in your home, office or wherever there is a radio.
Can also be used as a conferencing system.

CAR-BABY USER'S MANUAL

1. HOW TO INSTALL
Clip the unit onto the speaker part of your phone set.
Place the phone set on the Phone Holder (option) or other convenient place in your car. Important: Keep within 1 meter between the driver and this unit, as the speaker party is talking from the Internal Mic of the phone set).

2. HOW TO USE
Tune the Car Radio to the right station (Frequency as shown on this packaging).
Switch on the power and the LED will be on.
Switch off the power after conversation to avoid the battery being driven off.
Please slightly tune frequency of the radio station if any slight cacophony is heard.
NOTE: Although the frequency is occupied by a radion station, this won't be heard when conversation begins.

3. TROUBLE SHOOTING
Decrease the volume of your Car Radio or your phone set to avoid heavy Echo.
Replace the internal battery in case of heavy cacophony or a shorter distance reception.

4. HOW TO REPLACE THE BATTERY
Push the clip at the bottom to open the battery cover.
Put the cell into the battery case.
Rebound the battery cover.

Perfect for alerting in silent mode situations.
Reduce Radiation
Visualize your incoming call at daytime and night time.

Reference: SAFE-GUARD

Name: Safe Guard Cellular Phone Electro Magnetic Waves Protector

Price: 4 Euros

There has been a lot of publicity in recent years concerning the very real fears of medical authorities around the world that electromagnetic waves, which emanate from mobile and cordless phones, mayl be the cause of brain tumors and other very serious illness of head and ears.

The Safe Guard absorbs between 80% to 99.9% of induced electromagnetic waves and actually improves reception sensitivity during phone use, it is an everlasting chrome plated, high performance product and attaches to the earpiece of your phone by self-adhesive.

Electro-magnetic waves consist of electric waves and magnetic waves. Characterislistically, electric waves are absorbed into an electric conductor, while magnetic waves are not absorbed into any material. We applied a high-performing electric conductor to absorb electric waves. For magnetic waves, P.C.B was applied to change path of magnetic waves by generating induced E.M.F. Also the special treated cloth solves electric waves and magnetic waves together.

Reference: A-BOOSTER
Name: Universal Cell Phone Antenna Booster
Price: 4 Euros

Enhance the signal on your cellular phone. Reduce static and improve reception with this easy to install internal antenna. Works with analog, and digital phones and service. You can also improve your signal on Beepers, Walkie-Talkies and two-way radios.

The Internal Antenna is a passive device designed to capture stray radiation in the body of the phone and re-radiate the signal to improve the phone's performance. The Antenna will work most efficiently when installed properly. When using the phone try to avoid placing your hand over the area where the Internal Antenna is installed.
Features

Small Size - 1.5 inches x .75 inches
Fits underneath the battery of your phone.
Works in Analog, Digital, Dual Band and Tri Band Phones
Works on 900MHz, 1800MHz and 1900MHz range systems
Improve reception in Buildings, Tunnels, Elevators
Reduce dropped calls and static
Can be used on Pagers and 2 Way Radios (stick to any flat surface on unit)

Please note: The internal antenna has been shown to work to improve a phone signal where a signal exists, however, it will not help in areas where there is no signal. In rural areas and areas with consistently weak signal, you might consider an external antenna. Internal Antenna should not be moved from phone to phone as this may damage it.
Internal Antenna Installation

Remove the battery from your phone.
Wipe the phone's battery compartment with a dry cloth to remove any fingerprints or dirt.

Reference: BREATHTEST

Name: Digital Alcohol breath tester, light torch and timer keyring

Price: 35 Euros

Conveniently designed to measure BAC (blood alcohol concentration) in just seconds. It uses a simple method to analyse blood alcohol concentration at anytime and anywhere. It is a 3 in 1 device, alcohol tester, count up and count down timer and a torch.

Characteristics: - Measures BAC:
Under 0.05& BAC (0.25mg/L BRAC)- Green Led will light up
Over 0.05% BAC (0.25mg/L BRAC)- Yellow led will light up
Over 0.08% BAC (0.40mg/L BRAC)- Yellow and Red led will light up

- Timer: Count down and count-up timer can help you keep the deadline of your parking - Super bright Orange led flashlight with key chain - Requires 2 AAA batteries (not included)

Important: The readings from this blood alcohol level tester, if used as instructed, should provide an indicative guide to the level of alcohol in your body. No testing device is completely foolproof and inaccurate readings can occur due to user error and environmental conditions. Please consume alcohol responsibly and do not drink and drive.

Reference: LASER-LAMP

Name: Disco Laser light projector for pubs, DJ, party, etc.

Price: 80 Euros

The LASER-LAMP is a compact, full-colour laser projector useful for parties, discos, pubs and any event that needs up uplift. It projects 12 different designs on to the wall or the ceiling. The laser posses two levels of speed. The internal microphone can be synchronized with the sound to provide a spectacular show of lights in accordance to the music. Power supply can be administered via batteries (included) or thru source of electricity (not included).

Perfect for parties, discos, pubs o just to ¡¡ brighten up your house party!!

Package incluyes:
- Disco laser DL 112.
-Mount
-4 Batteries
-Instructions manual

Technical information:
Works with batteries: 6v CC (4 batteries included)
Source of Electricity: Input 230 V CA, 50Hz; Output 9V CC 300mA (not included)
Laser voltage: >3 Mw.
Weave length of the laser: 650 NM
Type of laser: 2A
Dimensions: 13, 5 x 12 x 8cm
Weight: 413 gr.

Reference: INKVISIBLE

Name: Invisible Ink Pen with UV light for spying and detecting

Price: 10 Euros

Your writing can only be viewed by applying a black UV light on the writing.

The ink is visible under ultraviolet light.

Each invisible ink marking pen contains invisible permanent ink. It's safe and reliable and easy to use.

Multiple uses:

Detect fake notes : Thanks to the built in UV light you can now identify false currency notes.

Mini Flashlight : You can use the light in case of an emergency.

Invisible INK: spy pen features ink that is made of special high-brightness compounds that are invisible to the naked eye, but magically illuminate when exposed to ultraviolet light. A blacklight is conveniently located on the opposite end of the pen, allowing you to read any messages left to you by your spy friends, perfect for writing down secret spy messages, it can also be used to mark your valuables with your name and phone number. Most importantly, it can even give you a hand at passing your exam.. no one has to know!!

Writing is visible under ultraviolet light.

The light is located on the bottom of the pen and turns on by pressing a small button.

Package includes:
1- Pen for writing invisible messages and built in UV light
1- Invisible ink refill
4- Button batteries.

Reference: ECOSFERASP

Name: Ecosphere self-sufficient Ecosystem in Oval shape 13cm glass

Price: 98 Euros

An EcoSphere is a working ecological system and its biological cycle represents a simple version of Earth s own ecosystem. While beautiful to look at, it demonstrates the delicate balance of a closed system like the Earth and contains some of the same essential elements that are found on our planet. The Earth is represented by the gravel at the bottom, (with) water filling approximately two-thirds of the system and air filling the balance of the space. Fire is represented by (the) light. And finally to complete the system, life the shrimp, the algae and the bacteria.

The EcoSphere is the result of technology developed at NASA s research laboratories. NASA scientists were researching self-contained communities for space explorers to live in during long-term space flights. And out of this work came the EcoSphere an ecosystem of animal and plant life in perfect balance with nature.

Each system comprises a clear soup of filtered seawater containing gravel and gorgonia (the non-living branch like material) together with some shrimp, algae and bacteria. Each is a key component of the ecosystem. The gravel, gorgonia and glass all provide surface areas to which the micro-organisms can attach themselves.

Reference: ECOSFERASS

Name: Ecosphere a self-sufficient Ecosystem in a round 10cm glass

Price: 99 Euros

An EcoSphere is a working ecological system and its biological cycle represents a simple version of Earth s own ecosystem. While beautiful to look at, it demonstrates the delicate balance of a closed system like the Earth and contains some of the same essential elements that are found on our planet. The Earth is represented by the gravel at the bottom, (with) water filling approximately two-thirds of the system and air filling the balance of the space. Fire is represented by (the) light. And finally to complete the system, life the shrimp, the algae and the bacteria.

The EcoSphere is the result of technology developed at NASA s research laboratories. NASA scientists were researching self-contained communities for space explorers to live in during long-term space flights. And out of this work came the EcoSphere an ecosystem of animal and plant life in perfect balance with nature.

Each system comprises a clear soup of filtered seawater containing gravel and gorgonia (the non-living branch like material) together with some shrimp, algae and bacteria. Each is a key component of the ecosystem. The gravel, gorgonia and glass all provide surface areas to which the micro-organisms can attach themselves.

The EcoSphere works by gathering energy from the light and converting it biochemically. Light, together with the carbon dioxide in the water, enables the algae to produce oxygen by photosynthesis. The shrimp breathe the oxygen in the water and graze on the algae and the bacteria. The waste from the shrimp is broken down by the bacteria into nutrients, which in turn feed the algae. The shrimp and the bacteria also give off carbon dioxide and the cycle is renewed when the algae use this once again to produce oxygen. EcoSpheres need warmth as well as light to function correctly. Keeping the temperature fairly constant assists the long-term viability of the system.

The shrimp have reproduced in some systems, but this is rare. The algae and the bacteria reproduce continuously. Over time gradual changes may occur the oldest systems end up with the blue-green algae (the green algae having become exhausted) but this can still produce sufficient oxygen to sustain the shrimp. In this way the system goes through transitions, starting out quite clear, then changing to a slightly cloudy cast and eventually becoming clear again.

The average life of the small EcoSpheres is two to three years. The larger systems tend to last longer because they contain more shrimp. It is not possible to be precise about this because much depends on the differing light and temperature conditions each system experiences. The actual age of the shrimp is also unknown. Some EcoSpheres have lasted ten years or more.

The shrimp eat the algae and the bacteria. If you watch closely you will see them feeding. If the green algae is no longer visible, don t worry, there will still be plenty of other algae and bacteria for them to graze on. The pale translucent shrimp-like images sometimes seen lying on the bottom are exoskeletons, which are shed by the shrimp (shrimp are crustaceans which means their skeletons are on the outside rather than the inside and they soon grow a new one, which expands and hardens). Nothing goes to waste in an EcoSphere these are eaten by the shrimp and the bacteria.

Product specification:
Size: Small Round Ecosphere, 10 cm diamater, 0.5 Liters
Number of shrimps: 3-4

Reference: LED-CLOCK

Name: Remote control leds light projection message clock

Price: 59 Euros

Features:

It combines the time and alarm clock, date and your personalized messages which can be programmed using a remote control.
It can be used used a clock, calendar and a message box for the family
The message display can be used as a promotional message display or welcome board for your store.
As a digital world time clock and date of 12 major cities around the world: Hong Kong, Bangkok, New Delhi, Cairo, Paris, London, Sao Paolo, New York, Los Angeles, Honolulu, Sydney, Tokyo (one by one).
It is also a perfect gift for your friends and family. The receiver will have a surprise when they find the message displayed after opening the box!

Special Features:
Desktop or wall mounted options.
All functions can be set by remote control.
Programmable timepiece and calender.
It is a multi-function and purpose device for timer, alarm clock, calendar and personalized message display by moving LEDs.
It can display the date and time in 12 major cities around the world.
10 built-in messages which can be displayed auto-periodically.
User may create 9 sets of their own personalized messages and each message contains maximum 100 characters.
Whith flash animation colourful background.
AC/DC powe adapater
Can use 3 Alkaline "AAA" batteries for data memory (batteries not included)
Easy and safe operating.

Technical Specifications:
Display method :
From left to right/from right to left
From top to bottom/ From bottom to top
Go up and then rotate backwards
From both sides and move to center/From center and move to the sides

Display content:

Time : format 24 hours (00:00)
Date: DD:MM:YY
Day : Sunday/ Monday/ Tuesday/ Wednesday/ Thursday/ Friday/ Saturday
Message content: user can set the specific date for message displaying
Message setting: enter the required display "set message" right after the date is set for message display

Message Displaying:

Message will be displayed periodically and automatically with the pre-set date
If no message if set, the time and date will be displayed periodically.
If message is set, the message, time and date will be displayed periodically.
Built in messages included:
Content:
* Happy (set to display daily)
* Happy New year (set for 1st of January)
* Velentine! (set for 14th of February)
* Christamas Eve (set for December 24th)
* Merry
* Merry Christmas (set for December 25th)
* Boxing day (set for December 26th)

Reference: PROJ-CLOCK

Name: Desktop Projection Alarm Clock With Thermometer

Price: 29 Euros

Features:

Projects the time onto any surface in large, easy-to read, blue digits
With snooze alarm function
Rotate lens to project the time wherever you want
With continuous projection function
Power: works on 3 pieces "AAA" alkaline batteries (not included) or DC 4.5V adaptor (not included)
Body Color: Translucent blue with sliver for blue projection digits
LCD with Blue backlight shows 12/24 hour time, alarm time, month, date, day, year and F°/C° temperature

Reference: LED-CARD

Name: Led card with personalised text

Price: 29 Euros

Now you can advertise your business face-to-face at trade shows, conferences, events, meetings, and parties. The LED badge does the hard part for you by breaking the ice. People will be drawn in by the glowing messages as they scroll on your shirt.
To attract more attention to your message you can speed up the message or add give more luminosity to your message. Either way it's totally up to you what message you input and what speed or luminosity rate you select.

Features:
Slim & small design
Data communication: easily input by hand
LED: 19 x 5 dot matrix
Product dimensions: 80mm x 42mm x 3mm
Display led window dimensions: 71mm X 15mm
Color of LED: red
Power: Runs on 1 CR2032 3V Lithium Battery (package comes with 2)
Slim design - and MAGNETIZED on back (metal plate detaches - strong magnets are underneath, sealed into the unit. Holds easily through shirt or placard)
Operation time: about 20 hours
With 9 levels of speed to display, and 9 levels of luminance for adjust by user
Weight: 10g
Badge can store 6 messages (1 can store 512characters, 2-6 can store 256 characters). Only one message can be displayed at a time

Type whatever message you would like to see the badge display by using the demo on the left. After you finish typing your message press the send button to play your message..

Reference: KEY-FINDER

Name: Keyfinder Keyring with sound and flashing light

Price: 5 Euros

The sonic key finder ends hours of hopelessly searching for your keys. All you need to do is clap, whistle or shout.Any loud noise causes the key finder to beep and the light to flash. Also handy for finding keyholes.

Features:
Light: helps to find keyhole when it is dark

When you lose your keys, just whistle to find them
The key finder will emit a high pitched noise
Blister packed, includes two replaceable batteries
Product size: 5 X 3.5 X 1.2cm

Reference: FOTOMOSAIC

Name: Personalized photo Mosaic

Price: 24 Euros

uCables.com offer you a personalized mosaic photo in poster size, it is an incredible keepsake that will get the attention from everyone who sees it.

A mosaic photo is a photograph composed of thousand little pictures which put together compose a large photograph . If we get closer to the main photo, we can clearly see the small pictures, but as we move away from the photo we can see the image that these small photos make to show us a much more large scale of the image. In order to achieve this, we need to analize the main image and find pictures that best suit the photo, such as color and format.

In order to obtain a good result the main image needs to be simple , without much detail. We recommend you send us photos such as , portraits or upper body photos. At the same time, the main image needs to be big in order to appreciate the details of the photo.

The personalizes Mosaic Photo is a great present for any occassion it is original and uforgetable.

Types of Mosaic:
Flowers
Beer brands
Cd covers
Disney
Pictures
Birds
Technology

Steps to follow in order to place an order:

1. Send a photo via email to: in format JPG, GIF, BMP, etc.

2. We will make a trial image to see how it would look and send it to you for confirmation. Image will be in a poster format.

3. If you are happy with it, we will proceed to send it via email in a JPG format.

Reference: SEP-ALARM

Name: Tracking and separating alarm for your personal effects

Price: 24 Euros

You no longer have to worry about your phone, wallet, keys, bag, handbag, etc.. now you can find your accessories in a matter of seconds!

Alarm turns on when transmitter and receiver are separated. Alarm turns off when transmitter and receiver are connected
Mini design; can be easily put into wallets or pockets
Quick and safe: receiver produces a beep sound and vibrates immediately when transmitter part is beyond the receiving range (approximately 15 meters). Once the receiver is closer to the transmitter the vibrating stops.

Keep your personal belongings within reach.

Ideal for:
- pet wandering alert.
- mobile phone alert.
- suitcase & luggage alert.
- wallet alert.
- And many many more usages!

Characteristics:

Transmitter:
- size: 44 (H) X 28 (W) X 8 (D) mm
- Weight: 9.3 grams
- Battery: CR2032 (x1)

Receiver:
- Size: 60 (H) X 36 (W) X15 (D) mm
- Weight: 28.0 grams
- Battery: AAA Battery (X1)

Range:
- Up to 15 meters

Battery life:
- Receiver: approximate. 1 month
- Transmitter: approximate. 1 month.

Instructions:
* Place a AAA Battery on the receiver
* Switch the power supply of the Transmitter to "on". You will notice that the light will twinkle this is because it is sending out a signal.
* Turn the receiver on to N ON . It will beep several times. After a short period it will beep two times , this indicates the successful coding study of the transmitter.
* Transmitter should be attached to the object being protected.
* Adjust the distance debugger of the receiver to a suitable distance. Move the distance debugger (round lever) from down to up to adjust the distance from near to far and vice versa.
* Receiver should be attached to the owner.
* When the object being protected goes further than the set distance and you hear the alarm, switch the power supply to "S-ON" At this point the motor starts to vibrate. It stops vibrating and beeps similar to the indicating sound when it comes near the object. This way your objects are always protected!

Reference: GLOW-RING

Name: Vibrating Glow in the dark condom ring ViCon

Price: 7 Euros

This vibrating glow in the dark condom ring will turn any condom into a thrilling vibrator! It has the added bonus of glowing in the darks, so its double the fun! It is designed to fit securely at the base of the condom, emitting strong vibrations that provide exciting stimulation for both partners.

Powered by an ultra light battery that is safely enclosed in a soft silicone shell, the vibrating condom ring can run up to 25 minutes.

As an added bonus, the vibrating condom ring also helps maintain a strong erection.

Slide the ring over an erect penis until it reaches the base of the penis. The protruding point is designed to face upwards to stimulate a woman's sensitive areas. Gently trigger the on/off switch to experience vibrating fun during sexual intercourse.

Recommended for one-time use only.

Reference: RING-VIBRA

Recommended for one-time use only.

Each ring is sterilized and vacuum packaged.

Reference: LASERPOD

Name: Fantastic Laser Light Lamp - Laserpod

Price: 98 Euros

Using the latest in laser, LED (light emitting diodes) and crystal optics, Laserpod brings science and nature together to create ever-changing organic light forms of profound beauty.

Laserpod is one of the most innovative lighting products since the lavalamp of the sixties, simple in principal, Laserpod actually uses super advanced technology to generate the purest light known to man.

It is the patented invention of the innovative UK light artist Chris Levine, whose varied and ground breaking work in light has ranged from light sculptures for the band Massive Attack and some of the most leading edge fashion designers, to an historic hologram portrait of the Queen of England. His work is about the experience of seeing and the living power of light, an ethos that is distilled into Laserpod.

Laserpod uses three electronic lasers and three blue and purple LED's, chosen so that the combination of their wavelengths work as a background to the red laser to give a super sensory experience.

This intense light energy is projected through a crystal and the output of this wondrous device can be described as awe inspiring!

With the diffusers on top of the alloy cylinder, as supplied in the package, the effects are contained and Laserpod becomes a soothing ambient lamp.

The visual images start when the diffusers are removed-the light forms will radiate and project across an entire room and over great distances.

You can interact with Laserpod by placing anything optical on top of the unit, glass, crystal or clear plastics will all produce the most profoundly beautiful effects.

For the best Laserpod experience, the device should be activated in complete darkness when the more meditative and organic beams will be seen- these are extraordinary and are quite unique to Laserpod.

Laserpod is portable and can function for up to 8 hours on three AA batteries or run directly from mains on the powerpack.

Photography and video will not do justice and nothing can compare to the experience of seeing it perform live!
A revolution has started. Feel the Light.

Reference: LED-CLIP

Name: PiX Multi-Functional Sport LED Clip

Price: 38 Euros

A mobile display accessory, designed to be more than just a simple display. Pix Sports is a clock, a stopwatch, a pedometer, a signal, a motion responsive display, and even a scrolling message display. Users can flash dynamic icons or personal text messages, or utilize it as a motion responsive display.

The clip will let you stick PIX Sports on almost anything. Take the clip off and you can even fix it to a string and wear it as a necklace or attach it to your backpack. It only uses 2 buttons (marked A and B) to give you access to all of the PIX's features. Whatever feature you are using, you'll have access to 75 high intensity LEDs all in a convenient 3" by 1" form factor.

Features:

The Counter acts just like a pedometer, by counting the frequency of movement when attached to a pocket, or even your boot laces!

PiX Sports can display a Message of up to 30 characters in a scrolling display - such as your name, URL, phone number, e-mail address, company name etc..

In Watch mode, Pix Sports displays the current time

The stopwatch function measures time lapse to 0.1sec accuracy

Signal mode displays a signal chosen from your choice of 10 animated patterns

In Motion Responsive Display model, a pattern changes in proportional to the frequency of body motion - great for clubbing

Naturally to cope with the great British weather, PiX Sports is splash-proof to cope with outdoor activities!

Specifications:
Size: 3 X 1 X 0.5in
Weight: 0.8oz (including batteries & clip)
Display: 15 X 5 matrix high luminous intensity LED
Power: 2 x 3V CR2032 Lithium battery (included)
Run time: over 70 hours (all LED constant running)
Included accessories: Belt clip and screw, User manual

Important note: To turn PiX Multi-Functional Sports Clip off completely, batteries should be removed as the batteries are also consumed in power saving mode.

Reference: LED-CAP

Name: Baseball cap with small led monitor

Price: 24 Euros

Type whatever message you would like to see the badge display by using the demo on the left. After you finish typing your message press the send button to play your message..

Reference: DRIVEALERT

Name: Anti-drowsy alarm for drivers

Price: 23 Euros

The Driver Alert is an anti-drowsy alarm designed to raise drivers awareness of momentary lapses caused by sleepiness and tirendness. Wear behind the right ear it works on the principle of electronic balance. As the driver head nods below a preset angle it emits a loud alarm signal alerting the driver to take corrective action, take a break or even take a nap!. The driver alert device is not only designed for drivers, it is perfect for people who need to be on full alert while on duty such a security guards guards, machine operators, and even students who need to work on their posture.

Instructions:

On the device is a little lever switch, shift it to the right towards ON

Test that it is working properly by tilting it forward, if it beeps then it is at working mode

Place behind your right ear and adjust, it should be placed correctly for effectiveness. Your head should not nod more than 30 degrees (the less the better), before it beeps

When the device is no longer required move the lever towards the word OFF

Reference: SHAKETORCH

Name: Shake Torch Faraday Star without batteries

Price: 29 Euros

Forever Flashlight uses no batteries and requires only the single, included LED. Leave it unused in your car's glove box for years with complete peace of mind-you'll get that all important light when you need it.

Forever Flashlight pays for itself quickly by saving you the cost of the batteries required to keep a standard flashlight in working order.

How the Forever Flashlight Works: English physicist Michael Faraday discovered that any change in the magnetic environment of a coil will "induce" voltage in that coil. Forever Flashlight makes use of Faraday's Law of Induction to give you a lifetime of light without batteries replacement LED's or maintenance worries. The math used in Faraday's formula may be a bit challenging, but the Forever Flashlight makes it all simple-shake it and slide on the switch to get a dependable light every time!

Instructions:
Simply, shake the the Faraday Star flashlight for 30 seconds and you will have enough light to last you 5 minutes

Characteristics
Light is visible from 1km away

It does not require batteries or light bulb.

shock resistant and water resistant

Floats on water

Reference: GSM-ALARM

Name: Security Alarm interface to Ericsson mobile phone

Price: 96 Euros

Long distance security / surveillance device using a GSM mobile phone.

Controller to signalizings and monitoring the remoted objects apartments, garages, houses and etc with issue a warning signal on mobile telephones of standard GSM.

Features
Based on SMS with GSM mobile phone for operation
Portable size to install anywhere
1 input port (I/P) and 1 output port (O/P)
Auto-send SMS when I/P changing status (as A-SEND jumper is open)
Green LED indicator for status information
Reset button for device initialization
Use RJ45 plug for easily installation
Low battery consumption for battery operated
Advanced / professional user can programming IC s (ATtiny12L) firmware for their own purpose
Optional DC circuit for external 5V DC input through RJ45

Introduction
SMS I/O Alarm Device connects to some models of mobile phones through data cable. We provide cable for Ericsson T28 and compatibles. Its function is to provide an input port (I/P) and an output port (O/P) capable of being remotely controlled using another mobile phone.
Control process takes place by means of mobile phone s SMS. When the mobile receives a predefined SMS message, the circuit automatically recognizes it as a “command”, and switches the O/P accordingly. Besides switching the O/P to "On" or "Off", the user can pulse it for a short period (e.g.. Reboot the remote server.).
The device can be used as well to notify the status of I/P (as setting of A-SEND jumper is opened), it will send a SMS message automatically every time when the I/P changing status. To know I/P status at any time, the device can send back a SMS describing the status of the I/P, as a response to a request SMS message. The applications are countless. It can be used to make an extended range remote control, operable from anywhere in the world.

Download here GSM-ALARM instruction manual.

Applications:
Alarm systems (home, garage, office, etc)
Use of control contact from sensors (pressure, temperature, hummidity, etc)

Reference: A-BOOSTER

Name: Universal Cell Phone Antenna Booster

Price: 4 Euros

Enhance the signal on your cellular phone. Reduce static and improve reception with this easy to install internal antenna. Works with analog, and digital phones and service. You can also improve your signal on Beepers, Walkie-Talkies and two-way radios.

The Internal Antenna is a passive device designed to capture stray radiation in the body of the phone and re-radiate the signal to improve the phone's performance. The Antenna will work most efficiently when installed properly. When using the phone try to avoid placing your hand over the area where the Internal Antenna is installed.
Features

Small Size - 1.5 inches x .75 inches
Fits underneath the battery of your phone.

Reference: ANTI-SLIP

Software to customize, synchronize, change logos, ringtones, etc. can be downloaded from www.my-siemens.com

Reference: MOT-C33X

Name: USB Data Cable for Motorola C33X Series

Price: 19 Euros

With USB Data Cable for Motorola C33X Series you will be able to make the following the functions:

Unlock Motorola C33X Series phones
Edit/change logos and ringtones
Data Transmission
Connect to the Internet with the suitable software which will be avaible in the uCables.com members area very soon
Note: If you wish to unlock your phone you can also use these two devices: SMARTCLIP or CLIP-C3XX.

Reference: USB-EXT5M

Name: USB extension cable

Price: 30 Euros

Use it to extend an usb device such as printers, modems, scanners, digital cameras, etc..
Extends the A connection (flat end) of a usb cable.
The USB standard limits the length of a usb cable to 5 meters (about 16.5 ft.).
If you need to extend a device further, use this active extension cable.

Reference: MA-620

Name: MA-620 USB Infrared Adapter

Price: 81 Euros

- Connectivity between desktop PC and mobile phone/PDAs

MA620 USB Infrared Adapter is a software and hardware 2-in-1 package that enables desktop users to do wireless BI-way data transmissions to infrared-equipped mobile phones, PDA, Palm Pilots, notebook PCs, and Windows CE machines.

Functions The MA620 USB Infrared Adapter package comes with Handset Manager, allowing a user to access, edit, and personalize their phone book, calendar, SMS messages for the convenience of business, communication, and fun.

Moreover, the software allows a user to manage data in their native languages, because the current version of Handset Manager supports over 10 languages including Arabic, Chinese (Taiwan), Chinese (China), Czech and Slavic Languages, German, Dutch, English, French, Italian, Russian, Spanish.

Handset Manager features: Phone Book Editor Manage your phone book the easy way with the Handset Manger phone book function. With the MA-620, you can save time, by adding entries and changing your numbers on your PC instead! Import and Export your phone book contents to and from contact manager software such as Outlook/Outlook express or Palm Software, via CSV file format. Edit and update into your phone via the phone book editor. Add or delete numbers, change their position, switch them between SIM and phone storage - then upload them back to your phone! Keep a back-up of your contacts on your PC.

SMS Editor

Send text messages by simply composing them on your computer and sending them through your phone! Compose a message on your PC and then send it via your phone. The multiple destination SMS send function makes sending to more than one number easy! Compose a new ringtone or logo and then send it as a message! Keep a back-up of your contacts on your PC.

Logo & Graphic Message Designer

The Logo Editor comes with the standard drawing tools, leaving you to concentrate on designing the coolest Logos around. New enhanced features allow you to view full-colour photo's and transform them into logo's effortlessly. Re-size and touch up and see instantly on your screen. Upload all the logos you find in the Internet. Change the Operator Logo. The MA-620 comes with 700 FREE picture logos! Design new Caller Group Graphics. Create new Picture Messages and send them to your friends. Replace the Startup Logo with one of your own. Import common Logo file formats, including Windows .bmp files, jpeg,png,ico,pcx and tga. Upload/download pictures to your Nokia 7650 & Ericsson T68/T68i (including Communicam pictures).

Reference: MOT-USBV66

Name: Motorola V60, V66, V600, V525, V300, T720i USB data cable

Price: 19 Euros

Upload and modify ringtones, logos, wallpapers, screensavers in your mobile phone
See pictures and images from your phone camera and audio files. Modify files located at the mobile phone memory and send / receive files between your phone and your personal computer.
Use pictures in your mms or wallpapers and send it to your mobile phone
Edit easily your phonebook and contact directory of your mobile phone (Add contacts, organize groups, make backups from your phonebook)
Sincrhonize phonebook and calendar between your phone and your personal computer
Send short messages (SMS) from computer.
Send / receive faxes
Connect to internet
Install and remove java applications from your computer to your phone

It works in service mode too, to unlock, repair Motorola mobile phone V60 and V66 models.
If you need the software to access to Internet and e-mail on the go via your compatible Motorola phone, you can buy our Motorola V6X / V600 / V120 / V300 / T720i / V525 / V2XX Series Timeport USB Data Kit (03)
High-speed connection to your computer via USB.
USB Data cable Motorola V60/V66 is compatible with the following phones:

Compatible with V. Series 60c, V. Series 60t, V. Series 60g, V. Series 66, V. Series 120c, Motorola V120t, Timeport 270c and Timeport 280 phones and V200 Personal Communicator.

Compatible with Windows XP.

Please note: USB is not supported on Windows 95, 98 First Edition or Windows NT. Only compatible with Windows NT 4.0/98/2000/ME .
Software will be available soon at our website.
This cable works with Motorola Mobile Phone tools - PC 620 compatible with Motorola A835, A925, V500, V525 and V600. This software is a commercial software. If you are interested to buy contact us.

Reference: USBNETWORK

Name: USB PC to PC Network Bridge Cable

Price: 54 Euros

Features :
USB PC TO PC Network Bridge Cable
This unique cable allows you to easily construct a network via USB port and share all the resources such as files, printers periperals equipment and more.
Overview
The USB PC to PC network Brige Cable provides a quick and wast solution to network up to 17 USB computers via hot Plug & Play technology without adding any Network Interface Cards.
It is suitable for small offices, home offices, mobile users, and network gamers. With the USB PC to PC Network Bridge Cable users can play multi-player games, share files,printers, peripherals equipment and more.
12Mbps data transfer
Supports WIN98/2000/CE and Mac OS
Maximum cable length: 5 meters
Support TCP/IP, NetBEUI, IPX/SPX protocols
Full NDIS Driver Implementation
No external power needed
Complaint with USB specification version 1.1
USB full speed connection
Support Windows 98
Hot PnP for easy use

Reference: USB-IRDA

Name: USB Infrared Adapter of 4 Mbps

Price: 29 Euros

Specificacions:
Easily enable IrDA function on the PC through USB port
USB Plug and Play convenience
IrDA data rates from 2.4Kbps to 4Mbps (FIR support)
Obtains power from USB port
Uses standard IrDA transceivers
Full compliance to IrDA 1.3 and USB 1.1 specifications
4 Kbyte FIFO buffer memory
Support Windows 98, Windows 98 SE, Windows Me, Windows 2000 and Windows XP
Conection: Standard USB connector with 5ft (150cm.) USB cable
Weight: 78.5 g.
Transmit distance upto 1.0 m.
Transmit angle upto 30
SIR support upto 115 Kbps transfer rate.
FIR support upto 4 Mbps transfer rate.

Include:
USB-IrDA adapter
Software and drivers
Installation manual and user guide

Reference: USB-RS232

Name: USB to RS-232 serial converter

Price: 39 Euros

With this converter you will be able to connect your PC to your MP3 player, your notebook, your PDA, your cellular phone or your digital camera.

It includes:
Converter cable from USB to RS-232 serial conection
Software CD drivers for iMac, Windows 98SE/Millenium, NT/2000/XP
User's manual

System requirement:
64MB RAM or above.
Pentium 233 MHz or higher.

Reference: WIFI-54

Name: Pen size USB WI-FI Adapter 54 Mbps

Price: 39 Euros

The WI-FI TL-W 1000G adaptor enables a reliable connection to internet at a 54 MBPS speed without the need of cables. It is simple to use, easy to install, compact and fast and reliable data transfer at high speed.

Meets IEEE 802.11g/b standards
Support WPA, TKIP/AES, WEP-64/128 BIT
Support high speed transfer: 54/ 48/ 36/ 24/ 18/ 12/ 9/ 6/ 11/ 5.5/ 2/ 1 Mbps.
Connects to PC via USB 2.0 port
Easy installation and on-screen information
Drivers for Windows 98SE, ME, 2000 and XP.
Internal Antenna.

Reference: UNICHARGER

Name: Universal AC/DC Charger Adapter for Laptop and TFT monitors

Price: 45 Euros

Universal AC/DC charger and Adapter for laptops (SCAC2004), printers, monitors, cameras, etc. A very practical device equipped with different connectors for specific voltage needs.

Technical features:

Feature

Specification

Input Rated. Current.

0.5AMP

AC Input

100-240V, 1.0A, 50-60Hz

DC Output

12-24 V

Output Power

70W max.

Output voltage: 15V/16V/18V/19V/20V/22V/24V(-0.4/+0.5V@rating load)

DC 12V~24V

Output current: 3.7A@16V / 3.3A@18V / 3.2A@19V / 3.0A@20V

3.7AMP(Max)

Output voltage: 16V/18V/19V/20V(-0.4/+0.5V@rating load)

DC 16V~20V

Output voltage: 16V/18V/19V/20V (0/ + 0.6V NO LOAD)

DC16V~20V

Efficency

> 88% (TYP)

Output over voltage protection: > 24V

Yes

Overload protection

Yes

Short Circuit Protection

Yes

Operating Temperature:

0º C to 40º C

Important:
Make sure polarity of the DC connector plug connects correctly with the DC jack connector.
Select band switch’s output voltage that best suits your notebook/laptop computer before using the AC/DC Adapter/charger
NEVER change the output voltage while the adapter is working.

Package contains:
Universal charger SCAC2004 compatible with laptop computers
Extension cable
8 different connectors

Reference: LAP-LINK

Name: Parallel and serial Lap-Link Cable for fast file transfer

Price: 29 Euros

A serial cable used to connect two computers together for file transfer. This type of cable is technically a "null modem cable," but is often called a LapLink cable due to the popularity of the LapLink program. The LapLink cable simulates two modems using the telephone system. It crosses the receiving line with the sending line. A special parallel port cable is also available for higher transfer speeds.

Characteristics:
Length:1.8M
Parallel file trasnfer speed: 0,7 Mbps
Serial file trasnfer speed: 0,4 Mbps
DB25F and DB9F TO DB25F and DB9F

Reference: EXT-VGAPS2

Name: Universal VGA cable fitted for Keyboard, mouse and Video

Price: 29 Euros

The universal VGA PS2 cable is an all-in-one cable that minimizes desktop clutter by combining each cable into one convenient package. Each cable end is color coded (PC99) to ensure proper installation. Also, each cable is specially shielded with a ferrite core to reduce electromagnetic (EMI) and radio frequency interference (RFI).Each end of the cable includes a keyboard and mouse connector (6 pin Mini-Din Male) and a video connector (15 Pin HDD Male).

Features:
Flexible, rugged PVC unibody jacket for safety and durability
Comprehensive EMI/FRI protection via multilevel shielding
Cable Lenght: 1.80 meters
Connectors: HD15 Male, 2x PS/2 Male to HD15 Female, 2x PS/2

Reference: IPOD-USB

Name: iPod and iPod Mini USB 2.0 Cable

Price: 19 Euros

iPod & iPod Mini USB 2.0 Cable
The iPod dock connector to USB 2.0 cable is available to PC users for syncing and charging. With transfer rates of 480Mbps, 40 times faster than USB 1.1, you can download large files in seconds instead of minutes. Keep your existing USB devices, it works with all USB speeds. It is 100% USB 2.0 compliant and is ideal for use with all USB 2.0 and 1.1 devices.
Features:
* Offers Windows PC customers up to 480Mbps data transfer for quickly loading an entire music library on iPod or iPod mini.
* Compatible with iPod mini and iPods with dock connector only.
* Each USB 2.0 Cable features high-quality connectors for faster, more accurate signal transfer up to 480Mbps. This Apple-white USB 2.0 Cable far exceeds the standards and is ideal for demanding data applications such as audio and video editing.
* Cable length is 2 meters.

Reference: FIREWIRE64

Name: Firewire IEEE 1394 Cable 6 to 4 PIN - iLink - 2 meters

Price: 15 Euros

2 Meter = 6.5ft Firewire IEEE 1394 Cable 6 pin to 4 pin

IEEE 1394 FireWire iLink - 6.5 Feet

High Performance Universal I/O - Up to 400 Mbits / Sec and Beyond
Peer to Peer Data Transferring
Complementing with Universal Serial Bus (USB)
Digital Interface - No Need to Convert Digital Data into Analog
Easy to Use - No Need for Terminators, Device IDs, or Elaborate Setup
Plug and Play - Hot Attach/Detach without Rebooting the System
Flexible Topology - Daisy Chaining
Low Cost - Priced for Consumer Products - Quantity discounts available - Call

IEEE 1394 APPLICATIONS

Portable and Desk Top Computers
Audio, Image, and Video Products for Multimedia
Video streaming, Video Conferencing, Editing, Playback
Printers and Scanners for Imaging
Mass Storage Systems - RAID, etc.
Consumer Electronics - Digital Camcorders, VCRs, Set-Top Box, FireWire Networking

The Apple iPod has a 6-pin connector
depending on the connector on your computer. Laptops often use a 4-pin connector.

MY-C3-2, MY-C4-2

Reference: PCBC2-3M

Name: Printed Circuit Board for Sagem MYC2-3 and MYC2-3M

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
MYC2-3/C2-3M

Reference: PCB-C2

Name: Printed Circuit Board for Sagem MY-C2

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB comes equipped with two indicators marked as + and – so that a 5V/DC can be connected so the phone can receive adequate power supply.

PCB compatible with
MY-C2

Reference: PCB-X8

Name: Printed Circuit Board for Sagem MY-X8

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
MY-X8

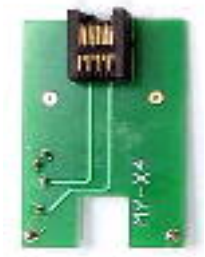
Reference: PCB-X6

Name: Printed Circuit Board for Sagem MY-X6, MY-X7, MY-V65, MY-V75

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
MY-X6, MY-X7, MY-V65, MY-V75.



Reference: PCB-X4

Name: Printed Circuit Board for Sagem MY-X4, SG322i

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
MY-X4, SG322i.

Reference: PCB-X3

Name: Printed Circuit Board for Sagem MY-X1,myX-1 Trio, MY-X3

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
MY-X1,myX-1 Trio, MY-X3, MY-X5, MY-X3-2.

Reference: PCB-X2

Name: Printed Circuit Board for Sagem MY-X2, MYX-2g, MYX-2m

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
MY-X2, MYX-2g, MYX-2m

Reference: PCB-Z5

Name: Printed Circuit Board for Sagem Z5 and Z55

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with
Sagem Z5 and Z55

Reference: PCB-VS2

Name: Printed Circuit Board for Sagem VS1/VS2 Vodafone Simply

Price: 20 Euros

Printer Circuit board with RJ45 connector compatible with: Sagem CDR Original box, CDR clones, Sagem Box SWS, Sagem JTAG and our SACODEREAD.

PCB compatible with

Compatible with :
VS1/VS2 Simply Vodafone.

Reference: RJ-E60

Name: Nokia E60 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-3250

Name: Nokia 3250 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-D800

Name: Samsung D800 to RJ45 UFS/ TWISTER/ EXCALIBUR

Price: 10 Euros

You can use this cable with any of the UFS boxes available, UFSTORNADO, TWISTER and EXCALIBUR.

Reference: EASY-FLASH

Name: Nokia Easy Flash cable for UFS,Twister and JAF box

Price: 20 Euros

Nokia Easy Flash cable for UFSTORNADO , Twister , N-Box and J.A.F box allows you to flash, unlock and service your phone in a much faster and easier way.

Compatible with: 1110, 1600, 6030, 6060 & 7380.

Reference: RJ-6280

Name: Nokia 6280 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-E860

Name: Samsung E860 with RJ45 connector for UFS/ Excalibur/ Twister

Price: 10 Euros

You can use this cable with any of our boxes: UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-7370

Name: Nokia 7370 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-6620

Name: Nokia 6620 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-2600

Name: Nokia 2600 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-6111

Name: Nokia 6111 to RJ45 Griffin/UFS/TWISTER cable

Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-6270
Name: Nokia 6270 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN boxes available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO, TWISTER and EXCALIBUR.

Reference: RJ-6060
Name: Nokia 6060 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-N70
Name: Nokia N70 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-T28
Name: SonyEricsson T28 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-C55
Name: Siemens C55cable with RJ-45 connector for Griffin/Twister
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with and TWISTER .

Reference: RJ-S35
Name: Siemens S35 cable with RJ-45 connector for Griffin Box
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules.

Reference: RJ-GD87
Name: Panasonic GD87 to RJ45 Griffin cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules .

Reference: RJ-3210
Name: Nokia 3210 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-3650
Name: Nokia 3650 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-3310
Name: Nokia 3310 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-9210
Name: Nokia 9210 to RJ45 Griffin/UFS/TWISTER cable
Price: 10 Euros

You can use this cable with any of the GRIFFIN box available, Griffin box gold, Griffin box platinum with crd and crussader modules and with UFSTORNADO , TWISTER and EXCALIBUR.

Reference: RJ-6110

Reference: LCD-3410

Name: Original LCD for Nokia 3410

Price: 33 Euros

This is the original full Nokia 3410 LCD with panel and speaker. All Nokia LCD have a simple installation procedure.
You only need to use Torx-6 tool to remove 4 screws. And make lever with mother board to remove slighty the broken LCD screen of any nokia

If you need assistance you can contact with our tech support department

Specifications of the LCD for our QC

We take into account two main specifications in our LCD to make our quality control, the resistence to a high temperature & to a normal temperature.
The resistence to a high temperature, it's the specification or the standard quality of the original LCD, by which the LCD will work within a temperature range from -20 to +80 Celsius.
The OEM version will work under normal temperature, where the LCD will work under a temperature range from -5 to +60 Celsius. You may have heard that some user's mobile phone screen turned black when the mobile phone was in a snowy environment.
If you are in a tropical country where ranges of temperatures do not exceed -5 to to 60 celsius degrees, our OEM version will work without any problem. But if you live in Rusia, Sweden or any other snowy country where temperatures could exceed working ranges of OEM design, we recommend you to use an original LCD that will work under temperatures of -20 and 80 degrees. The working tempeture depends on the display liquid located in the middle of the LCD glass.

Reference: LCD-V60

Name: Original LCD for Motorola V60 with flat cable

Price: 34 Euros

This is the original Motorola LCD with flat cable.

If you need assistance you can contact with our tech support department

Specifications of the LCD for our QC

We take into account two main specifications in our LCD to make our quality control, the resistence to a high temperature & to a normal temperature.
The resistence to a high temperature, it's the specification or the standard quality of the original LCD, by which the LCD will work within a temperature range from -20 to +80 Celsius.
The OEM version will work under normal temperature, where the LCD will work under a temperature range from -5 to +60 Celsius. You may have heard that some user's mobile phone screen turned black when the mobile phone was in a snowy environment.
If you are in a tropical country where ranges of temperatures do not exceed -5 to to 60 celsius degrees, our OEM version will work without any problem. But if you live in Rusia, Sweden or any other snowy country where temperatures could exceed working ranges of OEM design, we recommend you to use an original LCD that will work under temperatures of -20 and 80 degrees. The working tempeture depends on the display liquid located in the middle of the LCD glass.

Reference: LCD-T39

Name: Original LCD for Ericsson T39

Price: 34 Euros

If you need assistance you can contact with our tech support department

Specification of the LCD which is for our QC

There are 2 kinds of the specification on LCD, wide temperature & normal temperature.
For the wide temperature, it's the specification or the quality standard from the original one, where the LCD need to make sure work within the temperature range from -20 to +80 Celsius.
The OEM one is the normal temperature, where the LCD need to make sure work within the temperature range from -5 to +60 Celsius. So, sometimes, maybe hear some user's mobile phone screen turn black when the mobile phone is outside under the snowy environment.
If you are in a tropical country country where ranges of temperatures not exceed -5 to to 60 celsius degrees, our normal temperature OEM design will work without any problem. But if you live in Rusia, Sweden or any other snowy country that temperatures could exceed working ranges of OEM design, we recommend you Original LCD that will work between -20 and 80 degrees. The working tempeture depends on the display liquid located in the middle of the LCD glass. it's first of all, making the LCD pcb of the glass dimension to be same as original.

Reference: SOFT-CDLM

Name: LogoManager CD and license

Price: 38 Euros

Logomanager unlocks the power of Nokia phone and it allows you to design your own personal logos and ringtones.

Simply hook up your PC and Nokia phone via cable or infrared, and use LogoManager to truly customise your phone quickly and easily - and it is absolutely FREE.

Caracteristics:
You can create your own start up logos:
Identify with your phone as soon as it starts up. You can capture a photo, any picture from the internet or design your own.
You can change opertator logos:
Personalise your phone with a unique logo instead of the standard operator name.
Screensavers:
Customise your static screensavers for when the phone is not in use, and create animations for the 3330 and 3410.
Ringtones:
Add original ringtones to your phone so that it sounds like no one else's.
Picture messages:
Make your picture messages better than the rest.
Organise your phone book:
Add, delete or modify your phonebook entries and caller groups/graphics. No more worries if you lose or update your mobile, just save a back-up of the SIM card and phone contents to transfer to a new Nokia phone. You can also export your entire phonebook to a spreadsheet package for safe keeping and easy use.
Send via SMS to your friends:
As well as customising your own phone, you can send text, logos and ringtones to your friends' Nokia phones by SMS.

Compatible phones:
3210, 3310, 3330, 3390, 3395, 3410, 3510, 5210, 6110, 6150, 6190, 7110, 7190, 6210, 6310/i, 6250, 8210, 8290, 8310, 8850, 8910. You only need a cable or an infrared adapter.

System requirements:
Desktop PC running Windows Operating System.
16Mb RAM.
Compatible Nokia phone.
Cable/infrared connection to phone.

The box includes:
LogoManager software CD.
Instruction booklet.
Registration card.

Reference: SOFT-SDL

Support for NOKIA, SIEMENS, ALCATEL, PHILIPS, ERICSSON, MOTOROLA, MAXON, PANASONIC, MITSUBISHI, NEC, SAMSUNG mobile phones. Be sure that your phone is unlocked, to be sure that SIMCARD8 will be accepted at your mobile phone.
SIMEMU management throught mobile menus.
Change mobile phone number without turning off mobile phone (this option is not compatible with all mobile phones)
Selection of the ratio of SMS/Phonebook entries in the mobile itself

Remember that you will need to read IMSI and Ki using SIM-SCAN

IMSI is the IMSI value to store in position N. It's a number with a length of 18 decimal digits, beeing the first two always "08". Example: 081234567890123456

KI is the valude of the KI to be stored in position N. It's an hex number (0-9 and A-F caps) with 32 digits length. Example: 0123456789ABCDEF0123456789ABCDEF

System Requirements: Software works best with Windows98

IMPORTANT NOTE: The device is only compatible with GSM SIM COMP128-V1, If you try to read a SIM card bought since June 2002 you may not be able to do it, because phone operator companies are changing the algorhythm for the implementation of KI and IMSI encryptation.
We have available another product that makes sim card backup but in addition you can makes backups of your phonebook, its SIM-BACKUP

Reference: EPIC-PROG

Name: EPIC Programmer for PICmicro controllers

Price: 60 Euros

Features
Low cost programmer for most PICmicro microcontrollers
Connects to PC parallel printer port
ICSP programming
The programmer has a built-on 18-pin socket for programming 8-, 14- and 18-pin DIP packaged PICmicro MCUs and must be powered with a power adapter within the range of 15 - 18 Volt. (Before using the programmer be sure to adjust the programming voltage of 13.5 Volt using the mounted Potentiometer and a Voltmeter) (For other packages you must make an adapter or use the ICSP feature)

List of supported Devices
12C508(A), 12C509(A), 12CE518, 12CE519, 12C671, 12C672, 12CE673, 12CE674, 12F629, 12F675: Supported.
14C000: Supported
16C432, 16C433: Supported
16C505, 16C554, 16C557, 16C558, 16C61, 16C620(A), 16C621(A), 16C622(A), 16CE623, 16CE624, 16CE625, 16F627(A), 16F628(A), 16F630, 16C71, 16C710, 16C711, 16C712, 16C715, 16C716, 16C717, 16F676, 16F818, 16F819, 16F83, 16C84, 16F84(A), 16F87, 16F88, 18F1220, 18F1320: Supported.
16C770, 16C771, 16C781, 16C782: Supported
16C62(AB), 16C63(A), 16C64(A), 16C642, 16C65(AB), 16C66, 16C662, 16C67, 16C72(A), 16F72, 16C73(AB), 16F73, 16F737, 16C74(AB), 16F74, 16C745, 16F747, 16C76, 16F76, 16C765, 16F767, 16C77, 16F77, 16C773, 16C774, 16F777, 16F870, 16F871, 16F872, 16F873(A), 16F874(A), 16F876(A), 16F877(A): Supported
16C923, 16C924, 16C925, 16C926: Supported
17C752, 17C756(A): Supported
17C762, 17C766: Supported
18F1220, 18F1320: Supported
18F2220, 18F2320, 18C242, 18F242, 18F2439, 18F248, 18C252, 18F252, 18F2539, 18F258, 18F4220, 18F4320, 18C442, 18F442, 18F4439, 18F448, 18C452, 18F452, 18F4539, 18F458: Supported
18F6520, 18F6525, 18F6585, 18F6620, 18F6621, 18F6680, 18F6720: Supported
18F8520, 18F8525, 18F8585, 18F8620, 18F8621, 18F8680, 18F8720: Supported
18C601, 18C658: Supported using
18C801, 18C858: Supported using
PicStic1, PicStic1 2K, PicStic2, PicStic2 2K, PicStic3, PicStic 3 2K, PicStic4, PicStic4 2K, and PicStic5: Supported
rfPIC12C509AF, rfPIC12C509AG, rfPIC12F675F, rfPIC12F675H, rfPIC12F675K: Supported.

Tested and working with WinPicProg 1.91 Free programming software for various of the MicroChip PIC series of micro-controllers.

You will need port drivers to use winpicprog

Reference: SI-PROG

Name: SI-Prog programmer hardware interface for Ponyprog

Price: 42 Euros

SI-PROG is the programmer hardware interface for PonyProg. PonyProg is a serial device programmer software with a user friendly GUI framework available for Windows95, 98, 2000 & NT and Intel Linux.Its purpose is reading and writing of every serial device.

At the moment it supports I2C Bus, Microwire, SPI eeprom, the Atmel AVR and Microchip PIC micro.

The included eeprom adapter PCB supports:

I2C eeproms (24Cxxx and 24LCxxx)
SDE2506 eeproms
Microwire eeproms (93Cxx and 93LCxx)
SPI eeproms (250xx/950xx and 25xxx/95xxx)
NVM3060 eeproms

Set Includes:

Main Unit (Programmer)
Adapter PCB for eeproms
2x5pin header flatcable
RS232 extension cable

Remark:
It is si-prog interface for ponyprog, download ponyprog sw at www.lancos.com (and pls set up interface and calibration correctly)

Reference: SIM-SCAN

Name: SIM scanner to read IMSI and Ki codes from simcards

Price: 39 Euros

SimScan compatible smart card reader (working with Dejan`s Simscan V2.00)
RS232 powered
Main purpose: Finding Ki & IMSI for cloning cards

With Simscan V2.00 you can analyze:
ATR (For any card)
CLA+INS (For any card, while comments are valid only for GSM SIM card)
FILES (For any card, while comments and analysis are valid only for GSM SIM card)
Ki (It is valid only for GSM SIM MoU A3,A8 ciphering algorithm.) SOME CARDS CAN BE DESTROYED USING THIS FUNCTION!!! ESPECIALLY PREPAID CARDS!!! BECAUSE THEY HAVE LIMITED RUNNING OF A38 FROM 10000 TO 65536 TIMES AND AFTER THAT A38 DO NOT WORK ANYMORE!!! During the work it is possible to interrupt the program by pressing any key. In case of interrupting, temp file will be saved, and later you may continue the analysis from the point you've interrupted it. Also, at every 512 cipher texts temp file is automatically generated, so that the analysis could be continued if a communication error with card occurs.

Set Includes:

SimScan compatible smart card reader
RS232 extension cable

Remark:
SIM Scan works with cardinal software too. Works best with WINDOWS98.

Reference: UNIPLAT4

Name: Universal Smartcards programmer UNIPLAT 2004 USB

Price: 70 Euros

Uniplat USB Programmer

Our latest and most advanced smartcard programmer. Based on a fast processor and connected to a USB port, it ensures fast and stable programming of most popular smartcards on the market and offers a very high degree of functionality at a very competitive price.

Characteristic

- Automatically detects Card type which has an advanced detection for detecting unknown cards.

- Connected with and power supplied by a USB(Universal Serial Bus) port. No external power required.)

- High speed programmer and more easy of use in mind. Programs most of popular smartcard on the market

-Software Liveupdate on Line Support

Supported system

Windows 98/98SE, Windows 2000, Windows ME Windows XP or Above. Plug & Play.

Application
Can programs all PIC or AVR based, such as below

Reference: SIMMASTER4

Name: SIM-MASTER SIM Card Editor with USB cable SMS, Phonebook

Price: 60 Euros

Features:

Compatible with all GSM Cellular phones
Edit your phone book in your PC
Edit SMS short messages in your PC
Read IMSI and Ki codes of GSM simcards, very useful to use with our new SIMCARD8 to make simcard backups
Edit and Change the personal ringtone for motorola cellular phone (Send as SMS function support needed. ex. V8088, V7689)
GSM SIM PIN code management
Connect to USB port, no need external power
Built-in hundreds of Midi ringtone for Ring Tone editing.
Copy and Backup phone book and SMS messages between your SIM cards.
Convenience sorting functions
Read IMSI and Ki codes from SIM Card with SIM-BACKUP or SIMscan 1.21

Sytem requirements:

486 or higher
One free USB port
Windows 95/98/ME/2000 operating system
2 Mb of free space

Packing Content:

SIM Card Reader/Writer with cable
CDROM contaning programs and Midi Songs

NOTE: Do not try to write on your simcard8 with Sim-master, you could damage the card. Once you have read the KI and IMSI of your old card write them on the option SIM-EMU of your simcard8 on the simcard8 through the phone keyboard.(The SIM-EMU option will appear in your phone menu once you have inserted the simcard8 on it).

NOTE 2: If you got a SIM card since June 2002, it may not be read by SIM MASTER because cellular phone operator companies are changing the algorhythm of KI and IMSI encryptation.

Reference: SIM-COPY

Name: GSM SIM Card Phonebook Backup keyring

Price: 24 Euros

Did you ever lose your phone or damage it?
How did you retrieve all you phone numbers?
Did you upgrade to a new phone and didn't want to type all those numbers in by hand?

Forget about those tiny cell-phone keys!

You don't need computer for these purposes!

Phonebook Backup is a stylish, easy to use device which can help you backup the phonebook information of your SIM Card. By simply pressing one button, you can copy the phonebook data of your SIM card to the device internal memory and keep it or copy phone book information from the device to your SIM Card. If you have two SIM Cards, you may also directly copy the phonebook data from one SIM Card to another.

Nothing can be easy. Just press one button.

Great Gift!

SIM Phonebook Backup is your complete solution!

Features
Avoid loss of phonebook data on SIM card when losing cellular phone
Compatible with all GSM specifications worldwide
Simple to use: backup/restore/copy phonebook information by pressing one button
Fast operation: backup/restore/copy phonebook information within one minute
Operated independent of PC or PDA
Support date exchange among different SIM cards
Small and light
Stylish design
Keychain inclusive

Reference: 2-SIMS-IN1

Name: Universal simcard to hold two sims in one

Price: 24 Euros

2 SIMS in 1 Card is a product designed for mobile phone users who carry two numbers. By cutting out the SIMs of the SIM cards and installing them to the product, users can carry two numbers in their mobile phones. By turning off and turning on again, users can switch to the other number automatically. But two numbers cannot be on-use at the same time. This is the best solution to have 2 phone numbers in 1 sim, because it works with any mobile phone and sims, except the sims that are uncuttable, like is shown at picture.

The following items will be provided in 2-SIM-in-1 Pack:

1 main 2-SIM-in-1 PCB : main product, two SIMs will be attached to this PCB.

Metal Cover : 1 piece provided. When covered by Metal Cover, the SIMs will be held and attached to the PCB properly.

Recovery Card : cut SIMs can be recovered by putting back into Recovery card.

Fake SIM : provided for cutting practice.

Label with Rectangles : stick at the back of SIM cards, cut along the black lines to a rectangle.

Blank Label : for adhering at the back of the Recovery Card with cut SIM.

Reference: SIM-BACKUP

Name: SIM-MASTER + SIM Card 8 in 1 Pack

Price: 72 Euros

SIM-BACKUP is a pack of SIM-MASTER + SIMCARD8.

SIMCARD8 is a preprogrammed simcard that allow to store or make a backup of 8 different mobile phone sim cards in only 1 simcard. You will need to know IMSI and Ki codes of every simcard that you want to make backup. IMSI and Ki codes are the codes that identify a simcard at your network provider, this codes are encrypted at your original simcard, to find out your will need our SIM-MASTER card reader/writer, conexion via USB port. If you need to connect it to serial port (com) you will need our product SIM-CLONE.

Features:
Support for 8 different provider names on the same card
PIN security management like original SIM cards. (3 PIN attempts + 10 PUK attempts)
Storage capacity 100 phonebook entries (0 to 100 in EEPROM and 100 on FLASH)
SMS storage capacity configurable from 20 SMS
Individual SMS centre number for each of the 8 phone numbers
Storage of 10 last dialed numbers (Used only on some mobile brands)
Support for NOKIA, SIEMENS, ALCATEL, PHILIPS, ERICSSON, MOTOROLA, MAXON, PANASONIC, MITSUBISHI, NEC, SAMSUNG mobile phones. Be sure that your phone is unlocked, to be sure that SIMCARD8 will be accepted at your mobile phone.
SIMEMU management throught mobile menus.
Change mobile phone number without turning off mobile phone (this option is not compatible with all mobile phones)
Selection of the ratio of SMS/Phonebook entries in the mobile itself

Remember that you will need to read IMSI and Ki using SIM-MASTER

IMSI is the IMSI value to store in position N. It's a number with a length of 18 decimal digits, beeing the first two always "08". Example: 081234567890123456

KI is the valude of the KI to be stored in position N. It's an hex number (0-9 and A-F caps) with 32 digits length. Example: 0123456789ABCDEF0123456789ABCDEF

NOTE:If you try to read a SIM card bought since June 2002 you may not be able to do it, because phone operator companies are changing the algorhythm for the implementation of KI and IMSI encryptation.

Reference: SIMCARD8

Name: Mobile phone SIM Card 8 in 1

Price: 18 Euros

SIMCARD8 is a preprogrammed simcard that allow to store or make a backup of 8 different mobile phone sim cards in only 1 simcard. You will need to know IMSI and Ki codes of every simcard that you want to make backup. IMSI and Ki codes are the codes that identify a simcard at your network provider, this codes are encrypted at your original simcard, to find out your will need our SIM-MASTER card reader/writer.

Features:
Support for 8 different provider names on the same card
PIN security management like original SIM cards. (3 PIN attempts + 10 PUK attempts)
Storage capacity 100 phonebook entries (0 to 100 in EEPROM and 100 on FLASH)
SMS storage capacity configurable 20 SMS
Individual SMS centre number for each of the 8 phone numbers
Storage of 10 last dialed numbers (Used only on some mobile brands)
Support for NOKIA, SIEMENS, ALCATEL, PHILIPS, ERICSSON, MOTOROLA, MAXON, PANASONIC, MITSUBISHI, NEC, SAMSUNG mobile phones. Be sure that your phone is unlocked, to be sure that SIMCARD8 will be accepted at your mobile phone.
SIMEMU management throught mobile menus.
Change mobile phone number without turning off mobile phone (this option is not compatible with all mobile phones)
Selection of the ratio of SMS/Phonebook entries in the mobile itself

Remember that you will need to read IMSI and Ki using SIM-MASTER

IMSI is the IMSI value to store in position N. It's a number with a length of 18 decimal digits, beeing the first two always "08". Example: 081234567890123456

KI is the valude of the KI to be stored in position N. It's an hex number (0-9 and A-F caps) with 32 digits length. Example: 0123456789ABCDEF0123456789ABCDEF

note: we dont sell simemu.
simemu is not an ucables product from version 6.0.

Some new cards use the new encryption algorithm COMP128 version 2.0, so its not possible to read IMSI and Ki to make copy of the simcard, in this case we recommend you to use our new product 2-SIMS-IN1

Reference: 5GOLDCARD

Name: Pack of 5 x Goldwafer Card with PIC16F84 + EE24LC16

Price: 36 Euros

Smartcards are cheaper if you buy in packs, this pack include 5 gold waffer cards, much more cheapers than if you get 1.

Perfect for sim card cloning and to use as backup copy of your smartcard to see European & Australian Satellite TV programs (Cards will be shipped unprogrammed!)
The famous Goldwaffer cards with built-in PIC16F84 and EEPROM 24LC16. Those cards can be used for European or Australian Satellite TV program decryption.

Shipping Weight: 0.01kg
Product Measures :8.5cm x 5.3cm x 0.1cm

Is necesary the programmer GSMTE-21 and the PICPROG1 programmer to make a SIM Card backup or clone it.

When you buy this product is only possible to pay by bank transfer.

Reference: 5SILVCARD

Name: Pack of 5 Silver card with PIC16F877+ 24LC64

Price: 66 Euros

Smartcards are cheaper if you buy in packs, this pack include 5 silver cards, much more cheapers than if you get 1.

The new PICCARD 2 with PIC16F877+EEPROM24LC64 in Plastic Format. The silver waffer card has a 16K eeprom memory built inside the 16F877 PIC chip and can be used to store more data than the normal type gold wafer card. Perfect for sim card cloning and to use as backup copy of your smartcard to see European & Australian Satellite TV programs (Cards will be shipped unprogrammed!)
The famous Goldwaffer cards with built-in PIC16F877 and EEPROM 24LC64. Those cards can be used for European or Australian Satellite TV program decryption.

Shipping Weight: 0.01kg
Product Measures :8.5cm x 5.3cm x 0.1cm

Is necesary the programmer GSMTE-21 and the PICPROG1 programmer to make a SIM Card backups or clone upto 8 different cards in one same sim card using the new dejan program GSM a38 Gold & Silver Wafer card

Here is the chip layout inside the Silver Wafer Card2:

The PIC16F877 and PIC 16F876 is the same chip, just more programming area on the PIC 16F877

The PIC16F877 is a high-performance FLASH microcontroller that provides engineers with the highest design flexibility possible. In addition to 8192x14 words of FLASH program memory, 256 data memory bytes, and 368 bytes of user RAM, PIC16F876 also features an integrated 8-channel 10-bit Analog-to-Digital converter. Peripherals include two 8-bit timers, one 16-bit timer, a Watchdog timer, Brown-Out-Reset (BOR), In-Circuit-Serial Programming , RS-485 type UART for multi-drop data acquisition applications, and I2C or SPI communications capability for peripheral expansion. Precision timing interfaces are accommodated through two CCP modules and two PWM modules. The PIC16F877 also supports low voltage self-programming, allowing the user to program the device in-circuit at the user s operating voltage. The in-circuit debugging feature allows the designer to emulate the PIC16F877 device without an in-circuit emulator (the MCU itself is the emulator). PIC16F877 applications range from body controllers, programmable machine controls, network maintenance, feature phones and field-upgradable pointing devices. PIC16F877 has 33 I/O pins.

When you buy this product is only possible to pay by bank transfer.

Reference: 10SILVCARD

Name: Pack of 10 Silver card with PIC16F877+ 24LC64

Price: 120 Euros

Smartcards are cheaper if you buy in packs, this pack include 10 silver cards, much more cheapers than if you get 1.

Reference: SIM-MASTER

Name: SIM-MASTER SIM Card Editor with serial cable SMS, Phonebook

Price: 57 Euros

Features:

Compatible with all GSM Cellular phones
Edit your phone book in your PC
Edit SMS short messages in your PC
Read IMSI and Ki codes of GSM simcards, very useful to use with our new SIMCARD8 to make simcard backups
Edit and Change the personal ringtone for motorola cellular phone (Send as SMS function support needed. ex. V8088, V7689)
GSM SIM PIN code management
Connect to Serial port (RS-232), no need external power
Built-in hundreds of Midi ringtone for Ring Tone editing.
Copy and Backup phone book and SMS messages between your SIM cards.
Convenience sorting functions
Read IMSI and Ki codes from SIM Card with SIM-BACKUP or SIMscan 1.21

Sytem requirements:

486 or higher
One free Serial port
Windows 95/98/ME/2000 operating system
2 Mb of free space

Packing Content:

SIM Card Reader/Writer with cable
CDROM contaning programs and Midi Songs

NOTE: Do not try to write on your simcard8 with Sim-master, you could damage the card. Once you have read the KI and IMSI of your old card write them on the option SIM-EMU of your simcard8 on the simcard8 through the phone keyboard.(The SIM-EMU option will appear in your phone menu once you have inserted the simcard8 on it).

NOTE 2: If you got a SIM card since June 2002, it may not be read by SIM MASTER because cellular phone operator companies are changing the algorhythm of KI and IMSI encryptation.

Reference: PICPROG1

Name: Smartcards, piccards and goldwaffers cards programmer

Price: 42 Euros

You will need this programmer to program the chips PIC16F84 and 24LC16B that are included in the PICCARD1 and PIC16F877 or PIC16F876

This programmer is used to program PICCard1 PICCARD2, PIC16F84 of Goldwaffers cards and PIC PIC16F877 / PIC16F876 of new Silver cards to use to make backup of Mobile phone SIM cards.

To program the EEPROm of the gold waffer card 24LC16 or the EEPROM 24LC64 of the silver card you will need GSMTE-21, thats is a modified version of phoenix programmer that can work with different resonators, to be compatible with more applications.

Reference: SEASON2

Name: Season2 Interface logger

Price: 54 Euros

Test device for logging data between the PC and any ISO7816 compliant smart card reader. Superior version with built-in smart card reader. Active / Passive device, so it may be used without external power supply. Needs external power supply, supplied with 9-Pin Serial cable. Check the internet for appropriate softwares.

Reference: APOLO-5

Name: APOLO 5 Programmer Atmel , Fun and Avr3 Cards

Price: 39 Euros

AVR-8 and Fun cards programmers, that use ATMEL AT90s8515, AT90sxxxx micros, it can program cards inserting at smartcard socket or connecting microcontrollers chips at any of 3 sockets available, in addition it can program EEPROMs 24CXXX.

It connects to the paralel port and don't require external power.

Compatible with:

microcontrollers AT90S8515, ATMega8515, AT90S2313 DIP format.

microcontrollers AT90S8515, ATMega8515 in PLCC format.

Eeproms 24CXX serie.

atmega 128 pic bloker, avr3 avr8 avr 9..

Reference: KNOTCARDII

Name: KNOTCARD II Boot 2.0 OS 3.5 compatible smartcard

Price: 56 Euros

KNOTCARD is the first high security flexible smartcard ECC/RSA, The new generation of fast smartcards, easy to program and effective. Very similar features of titanium cards.
This knotcard have a versatile operating system that supports many platforms (Infienon, Philips, Atmel, Samsung). Support applications for the algorithms ECC (technology based in elliptics curves) and RSA (encryption systems) Versión 1.4

Recommended programmer: TE-21
Compatible Software: KCLoader 0.4

Reference: APOLO-III

Name: APOLO 3 programmer Atmel AT90SXXXX Fun/avr3 cards

Price: 29 Euros

AVR-3, AVR-8 and Funwaffers cards programmers, that use ATMEL AT90s8515, AT90sxxxx micros, it can program cards inserting at smartcard socket or connecting microcontrollers chips at any of 3 sockets available, in addition it can program EEPROMs 24CXXX.
It connect to the paralel port and don't require external power.

You can use to program our new funwaffer card FUNCARD256

Reference: MTEST-CARD

Name: Motorola Test Card

Price: 19 Euros

Motorola Test Card enables you to check the software version of your mobile phone.

You do not need a computer to use this device, which allows you to check:
Original IMEI code (very helpful in professional GSM centre),
This card is compatible with all the older versions, such as STARTAC, it is not compatible with newer models.
Check if it is processor version.
Security code,
Lock code

Complete instructions are provided upon purchase. The following is a summary:

Entering into TEST mode
Insert TEST SIM in your phone
Power ON phone
Press # and keep few seconds

If everything is OK phone will be in TEST MODE!

Using command function

19
19N#
Display call processor s/w version - "CallProc xx.xx.xx"
This is the actual software version. The EPROM / Flash stickers also indicates the version. If the phone has been flash upgraded (with an EMMI Box), the stickers and the version reported by the test card will not be identical.

571#
Reset phone

58#
58xxxxxx#
Display Security code - "SECUR xxxxxx"
Change Security code to xxxxxx

59#
59xxx(x)#
Display lock code - "LOCK xxx(x)"
Change lock code to xxx(x)

60#
Display IMEI - "xxxxxxxxxxxxxxx"

01#
Exit Test Mode In order to know more about what you can do with our Motorola TEST go to our Full list of Motorola TEST card commands

Reference: FUNCARD256

Name: Fun Waffer Card with built-in AT90S8515 + 24LC256 EEPROM

Price: 18 Euros

The new Fun Waffer card with AT90S8515 + 24LC256 EEPROM in plastic format have 256 Kbytes of Memory, it gives you 4 times more capacity than regular funcards (that only have 64Kb).
It can be programmed with a regular Apolo programmer.
Perfect to use as backup copy of your smartcard to see European & Australian Satellite TV programs (Cards will be shipped unprogrammed!)

You can program this card using our new programmer: APOLO 3

Reference: 5GOLDCARD

Name: Pack of 5 x Goldwafer Card with PIC16F84 + EE24LC16

Price: 36 Euros

Smartcards are cheaper if you buy in packs, this pack include 5 gold waffer cards, much more cheapers than if you get 1.

Perfect for sim card cloning and to use as backup copy of your smartcard to see European & Australian Satellite TV programs (Cards will be shipped unprogrammed!)
The famous Goldwaffer cards with built-in PIC16F84 and EEPROM 24LC16. Those cards can be used for European or Australian Satellite TV program decryption.

Shipping Weight: 0.01kg
Product Measures :8.5cm x 5.3cm x 0.1cm

Is necesary the programmer GSMTE-21 and the PICPROG1 programmer to make a SIM Card backup or clone it.

When you buy this product is only possible to pay by bank transfer.

Reference: 5SILVCARD

Name: Pack of 5 Silver card with PIC16F877+ 24LC64

Price: 66 Euros

Smartcards are cheaper if you buy in packs, this pack include 5 silver cards, much more cheapers than if you get 1.

The new PICCARD 2 with PIC16F877+EEPROM24LC64 in Plastic Format. The silver waffer card has a 16K eeprom memory built inside the 16F877 PIC chip and can be used to store more data than the normal type gold wafer card. Perfect for sim card cloning and to use as backup copy of your smartcard to see European & Australian Satellite TV programs (Cards will be shipped unprogrammed!)
The famous Goldwaffer cards with built-in PIC16F877 and EEPROM 24LC64. Those cards can be used for European or Australian Satellite TV program decryption.

Shipping Weight: 0.01kg
Product Measures :8.5cm x 5.3cm x 0.1cm

Is necesary the programmer GSMTE-21 and the PICPROG1 programmer to make a SIM Card backups or clone upto 8 different cards in one same sim card using the new dejan program GSM a38 Gold & Silver Wafer card

Here is the chip layout inside the Silver Wafer Card2:

The PIC16F877 and PIC 16F876 is the same chip, just more programming area on the PIC 16F877

The PIC16F877 is a high-performance FLASH microcontroller that provides engineers with the highest design flexibility possible. In addition to 8192x14 words of FLASH program memory, 256 data memory bytes, and 368 bytes of user RAM, PIC16F876 also features an integrated 8-channel 10-bit Analog-to-Digital converter. Peripherals include two 8-bit timers, one 16-bit timer, a Watchdog timer, Brown-Out-Reset (BOR), In-Circuit-Serial Programming , RS-485 type UART for multi-drop data acquisition applications, and I2C or SPI communications capability for peripheral expansion. Precision timing interfaces are accommodated through two CCP modules and two PWM modules. The PIC16F877 also supports low voltage self-programming, allowing the user to program the device in-circuit at the user s operating voltage. The in-circuit debugging feature allows the designer to emulate the PIC16F877 device without an in-circuit emulator (the MCU itself is the emulator). PIC16F877 applications range from body controllers, programmable machine controls, network maintenance, feature phones and field-upgradable pointing devices. PIC16F877 has 33 I/O pins.

When you buy this product is only possible to pay by bank transfer.

Reference: 10SILVCARD

Name: Pack of 10 Silver card with PIC16F877+ 24LC64

Price: 120 Euros

Smartcards are cheaper if you buy in packs, this pack include 10 silver cards, much more cheapers than if you get 1.

The new PICCARD 2 with PIC16F877+EEPROM24LC64 in Plastic Format. The silver waffer card has a 16K eeprom memory built inside the 16F877 PIC chip and can be used to store more data than the normal type gold wafer card. Is necesary the programmer GSMTE-21 and the PICPROG1 programmer to make a SIM Card backup or clone it.

Reference: SIM-MASTER

Name: SIM-MASTER SIM Card Editor with serial cable SMS, Phonebook

Price: 57 Euros

Features:

Compatible with all GSM Cellular phones
Edit your phone book in your PC
Edit SMS short messages in your PC
Read IMSI and Ki codes of GSM simcards, very useful to use with our new SIMCARD8 to make simcard backups
Edit and Change the personal ringtone for motorola cellular phone (Send as SMS function support needed. ex. V8088, V7689)
GSM SIM PIN code management
Connect to Serial port (RS-232), no need external power
Built-in hundreds of Midi ringtone for Ring Tone editing.
Copy and Backup phone book and SMS messages between your SIM cards.
Convenience sorting functions
Read IMSI and Ki codes from SIM Card with SIM-BACKUP or SIMscan 1.21

Sytem requirements:

486 or higher
One free Serial port
Windows 95/98/ME/2000 operating system
2 Mb of free space

Packing Content:

SIM Card Reader/Writer with cable
CDROM contaning programs and Midi Songs

NOTE: Do not try to write on your simcard8 with Sim-master, you could damage the card. Once you have read the KI and IMSI of your old card write them on the option SIM-EMU of your simcard8 on the simcard8 through the phone keyboard.(The SIM-EMU option will appear in your phone menu once you have inserted the simcard8 on it).

NOTE 2: If you got a SIM card since June 2002, it may not be read by SIM MASTER because cellular phone operator companies are changing the algorhythm of KI and IMSI encryptation.

Reference: CPROG1

Name: Set PICCARD and Programmer

Price: 66 Euros

This set include the PICCARD1 and PICPROG1 programmer with a special offer.

Reference: PICPROG1

Name: Smartcards, piccards and goldwaffers cards programmer

Price: 42 Euros

You will need this programmer to program the chips PIC16F84 and 24LC16B that are included in the PICCARD1 and PIC16F877 or PIC16F876

This programmer is used to program PICCard1 PICCARD2, PIC16F84 of Goldwaffers cards and PIC PIC16F877 / PIC16F876 of new Silver cards to use to make backup of Mobile phone SIM cards.

To program the EEPROm of the gold waffer card 24LC16 or the EEPROM 24LC64 of the silver card you will need GSMTE-21, thats is a modified version of phoenix programmer that can work with different resonators, to be compatible with more applications.

Reference: PICPROG2

Name: Programador de PIC Cards (DIL format)

Price: 18 Euros

You will need this programmer to program chips PIC16F84 and 24LC16B included at the PICCARD2.

Reference: PICCARD2

Name: PIC Cards ISO7816 (DIL format)

Price: 16 Euros

Today, PIC Cards are used for an wide range of applications:
Identification of persons, to open doors, etc.
Electronic pocket
Backup of existing or Goldwaffercard or other PIC cards

This card are built in DIL format and is required to extract chips to program it, you can program it with the programmer PICPROG2. To program this card you can use IC Prog

Note: PIC Cards are shipped NOT programmed. The programming of PIC Cards to decode canal satelite channels, is not legal in many countries, please check laws before to do that.

Reference: PICCARD1

Name: PIC Cards ISO7816 (SMD format)

Price: 30 Euros

Today, PIC Cards are used for an wide range of applications:
Identification of persons, to open doors, etc.
Electronic pocket
Backup of existing or Goldwaffercard or other PIC cards

This card are built in SMD format and is not requirect to extract chips to program it, you can program it directly from the programmer PICPROG1. To program this card you can use IC Prog

Note: PIC Cards are shipped NOT programmed. The programming of PIC Cards to decode canal satelite channels, is not legal in many countries, please check laws before to do that.

Reference: GPSMAPOWER

Name: Garmin Mini 9 Pin Bare Wire Power/Data Cable (010-10513-00)

Price: 36 Euros

This cable is terminated at one end with a molded GARMIN mini 9 plug (to mate with the GPS receiver), and color-coded bare wires at the other end. Use it to permanently hard-wire your power and/or data connections for your GPS receiver.

Reference: ETREXDATAP

Name: Garmin etrex Data Cable without Power (010-10205-00)

Price: 30 Euros

This data cable has bare wires at the end so you can hard wire your GPS directly to another electronic device. This allows you to send speed and position data to devices such as a chartplotter, computer, auto pilot, radar, etc.

The data cable doesn't have power you'll have to run off your unit's batteries.

Reference: ETREX-CAR2

Name: Garmin e Series PC and Cigarette Combo Cable

Price: 52 Euros

This cable allows you to make a powerful connection between your GPS, your PC and a cigarette lighter power supply. Create routes and waypoints on your PC and transfer them to your GPS. You can also download map detail from MapSource CD-ROMs to compatible units.

Reference: GPSMAP-CAR

Name: GPS Circular 4 Pin Coiled Cigarette Lighter Adapter Cable

Price: 42 Euros

Save a battery's life-buy an adapter. This standard cigarette lighter adapter cable has a molded plug on one end that connects to Garmin GPS units with the round 4 pin plug. The other end, joined by a coiled cable, has a cigarette lighter plug (with removable fuse protection).

Reference: ETREX-HBAR

Name: GARMIN eTrex Handlebar Mount Bracket (010-10267-00)

Price: 33 Euros

Snap your GPS unit into this secure handlebar mount and it's ready to ride. Mount fits up to a one-inch diameter bar and is perfect for your bike, motorcycle or ATV. Includes hardware and instructions.
The maximum diameter rail this mount will fit is 1".

Reference: GPS12RS232

Name: PC Serial Port RS-232 to Garmin GPS12 Cable

Price: 60 Euros

This cable allows you to plug your GARMIN GPS12, 12 Map, GPS12XL and compatibles directly into your PC's serial port.
It include a car power adapter, so you don't need to waste batteries while you use in your car.

Create routes and waypoints on your PC and transfer them to your GPS. Also allows you to download map detail from MapSource CD-ROMs to compatible units. Cable features a standard 9-pin D connector. Does not provide wiring for external power.
Use NMEA 0183 interface to synchronize waypoints, routes with connection. Has been tested with oziexplorer and all compatible software.
With appropiate maps it will show your situation, route, velocity, etc. at any place in the world.
Can be connected to USB port with USB to Serial Cable Converter.

Reference: ETREXRS232

Name: PC Serial Port RS-232 to GPS Garmin Etrex Cable

Price: 38 Euros

This cable allows you to plug your GARMIN eMap, eTrex and eSummit Series Personal Navigator directly into your PC's serial port. Create routes and waypoints on your PC and transfer them to your GPS. Also allows you to download map detail from MapSource CD-ROMs to compatible units. Cable features a standard 9-pin D connector. Does not provide wiring for external power.
Use NMEA 0183 interface to synchronize waypoints, routes with connection. Has been tested with oziexplorer and all compatible software. With appropiate maps it will show your situation, route, velocity, etc. at any place in the world.
Can be connected to USB port with USB to Serial Cable Converter.
You can use this cable to upgrade your garmin etrex / esummit firmware, so you can get new enhancements and features implemented at your garmin GPS in the future.
If you need more info about etrex download etrex Advanced Users Guide (replaced by current manual)

Reference: IPAQ-ETREX

Name: Compaq iPAQ 36XX / 37XX series to GPS eTrex cable

Price: 43 Euros

Allow to use your Compaq ipaq 3600 and 3700 series to connect with GPS Garmin Etrex, it has been tested with oziexplorer and all compatible software. With appropiate maps it will show your situation, route, velocity, etc. at any place in the world.

Reference: CARSOFTMUL

Name: Mercedes Benz Multiplexer compatible with Carsoft 7.4

Price: 990 Euros

Features MCU controlled Interface for Mercedes Benz Carsoft 7.4 which is compatible with the original interface. Interface contains Multiplexer to connect to all diagnostic able Modules fully automatically.

Features
- Status Led for Power, MCU and K-Line status
- Rubber buffer rugged Aluminium casing
- DB37 connection to vehicle
- Includes ALL cables including even Sprinter cable
- All cables with a length of 1,5 metres

Package Contains
- MB Carsoft 7.4 Interface Multiplexed
- OBD2 connection cable (all K-Lines wired)
- MB 38 pin connection cable (all K-Lines wired)
- MB Sprinter connection cable (all K-Lines wired)
- MB 3 pin banana cable
- RS232 extension cable

(All packed into blue plastic carrying box)
- Software not included

Reference: MB-DAS2006

Name: Star Diagnostic Assistance System for Mercedes Benz

Price: 6700 Euros

The DAS STAR Diagnosis Assistance System is a professional diagnostic equipment for Mercedes Benz cars manufactured after year 2000, it is the replacement of HHT. Star Diagnostic operate based on the WINDOWS NT system, it includes workshops information systems (WIS system), the movement management system (STARUTILITIES) and the automatically diagnose system(the DAS system).The system offers total diagnostic coverage of all engine, chassis and body systems.. The system offers total diagnostic coverage of all engine, chassis and body systems .
Reading and re-setting of diagnostic trouble codes (DTC)
Real-time reading of dynamic data
Full component activation clearing and re-setting of adaptation values
Coding of all engine, chassis, body and instrumentation modules
Key configuration
Procedure for fitting Mercedes-Benz accessories through the D2B ring and MOST bus
Total ASSYST/ASSYST+ control (Active Service System) to update on board service history

DAS: Concise interface and straightforward operation using an IBM high-quality computer you can realize a quick and accurate code reading and testing on the car´s system.

WIS: Supply the whole view of the wiring diagram in a car, component location diagram and maintenance method. What you do is to enter the chassis number, and then you will get the manufacture data, engine configuration and the car model.

Features:
Engines (All Gasoline & Diesel Systems)
Transmissions and Electronic Selector Modules
AIRmatic and Active Body Control Suspension Systems
Traction Systems: ESP/ASR/ETS/ABS/BAS
SBC braking systems (211 & 230 chassis)
Supplementary Restraint Systems (SRS) / Airbag
All body modules OCP/UCP/LCP/SCM/SKF/KFB/RCM/DCM's
Drive Authorisation System
SAM (Signal Acquisition) Modules
Electronic Ignition System
Pneumatic System Equipment and ATA functions
Air Conditioning / climate control Systems
Instrument Cluster
Tyre Pressure Control
Parktronic System
Keyless Go
D2B Command & Audio Gateway (D2B and MOST networks)
TV Tuner
Headlamp Range Adjustment
Seat Electronics
RVC, RST & Vario Roof modules
Automatic Clutch System ACS (168 chassis)
M-Class Body Modules (AAM/EAM/DAS/SEM/VG Transfer Case)
ASSYST & ASSYST+ systems

Compatible :
- All Benz cars
- Autobus
- truck,
- saloon car
- sports car
- smart car

Testable system:
-ENGINE
- AUTO-SPEED
- AIR CONDITIONAL SYSTEM
- SRS
- ABS
- ASR
- MPL
- GM
- BENZ ORIGINAL ANTI-THEFT DASX SYSTEM
- KEYLESS ENTERING SYSTEM
- OBD-II SYSTEM

Package contains:
1 Multiplexer and CAN
Laptop Computer
1 38 pins cable
1 obd 16 pins cable
1 Sprinter cable
1 Banana cable
Software in Spanish/English

Reference: BMWCARSOFT

Name: BMW MCU controlled interface compatible with Carsoft 6.1

Price: 250 Euros

MCU controlled Interface for BMW Carsoft 6.1 which is compatible with the original interface.

Characteristics

Complete with all the necessary cables for diagnosis via 20 pins connectors (for cars prior 2001) and standard OBDII connector with 16 pins

Not compatible with CAN-BUS
Allows complete access to the cars systems
Erasing the Fault-Storage & Reset-Functions. Service Interval Reset, programming and other adjustments
Printing out a detailed Diagnostic-Report and integrated Customer Database
ECU-Coding, Live Data, Component Activation, Adaptation, synchronisation
Reading out the Complete Fault - Storage's
Manufacturer-Information about the Control Units
Compatible with CS 6.1 for BMW (not CAN-BUS)
Device is connected you COM (RS232) Port (always use real com ports, no virtual com or port converter)

Package contains:

• BMW compatible with Carsoft 6.1 (with RS232 extension cable)

• 20 Pins BMW cable

• 16 pins OBDII cable

Note:

IMPORTANT

we do NOT supply software with this device. Customer should source software from licensed providers or compatible software freely available on internet.

Reference: OBD2-BREAK

Name: Breakout box access all pins on a 16 pin OBD2 connector

Price: 115 Euros

Special breakout box which enables you to access all pins on a 16 pin OBD2 connector via 4mm female banana sockets.

Some cars use a lot of different K-lines for it's different systems like engine ECU, ABS, etc. this is needed for most scan tools if you want to access all the systems just by plugging the K-line into the right socket of the system (Examples of such cars are Opel or Mercedes Benz)

Reference: MB-BREAK38

Name: Breakout box access all pins on 38pin Benz diagnostic socket

Price: 125 Euros

Special breakout box which enables you to access all pins on a 38 pin Benz diagnostic connector via 4mm female banana sockets.

Since Benz use a lot of different K-lines for it's different systems like engine ECU, ABS, etc. this is needed for most scan tools if you want to access all the systems just by plugging the K-line into the right socket of the system.

Cable length is 1.5 metres and the cable is interchangeable by a DB37 connector from the box.

Reference: OBD2-BENZ

Name: 14 pins OBD2 adapter cable for Mercedes SPRINTER

Price: 100 Euros

Adapter for connecting to a vehicle which uses 14 pin Sprinter diagnostic connector

Characteristics:

Adapter OBD2 female connector with 16 pins to Mercedes Sprinter 14 pin round connector.

Reference: VAG-TACHO

Name: VAG Tacho interface to modify mileage,read immobilizer codes

Price: 300 Euros

A very handy device that can be used to modify mileage, read immobilizer secret codes and programming new keys to VW cars, such as : Audi, Seat , Skoda and Volkswagen.

Characteristics:

- VAG Kombi instrument / Immobilizer box eeprom programmer...by OBD connector
- Direct USB to OBD Connection
- All hardware inside OBD connector
- Works on any computer that has USB port - No more virtual COM Ports
- This is a TRUE USB connection
- Windows XP compatible software
- Automatic functions: Repair dashboard, Read PIN code. All this by using the car own OBD connector, without disassembling dash or immobilizer box from car.

Compatibility:

- Audi A4,A6,A8 separate immobilizer box 1994-1999 read PIN code, and read/write eeprom.
- Audi A3, A4, A6, TT, New Beetle Magnetti Marelli M73 (1998-2002 year) read PIN code / change mileage
- New Beetle Magnetti Marelli M73 (2001 to 2005 year) read PIN code
- Almost all VDO dashes for VW/Seat/Skoda up to year 2004 read/write eeprom.
- Almost all VDO dashes for Audi up to year 2001 read/write eeprom.
- Almost all MotoMeter dashes for VW/Seat up to year 2001 read/write eeprom.
- VDO SEED-KEY protected dashes supported (This means: Passat B6, Bora/Jetta to 2004 year, Golf 4 to 2003 year,Skoda Octavia/Fabia to 2004 year , some Seat dashes up to 2002 year etc.)

Software compatibility:
Running with latest version 1.5 of VAG Tacho (Do not use 1.6)

Package Include: VAG Tacho USB

Reference: KWP2000

Name: KWP2000 PLUS EDC15 ECU Reprogrammer for car power increase

Price: 699 Euros

KWP2000 Plus Interface for ECU flash reading/writing over OBD2 diagnostic socket for a wide range of ECU units.

INCREASE YOUR CAR POWER AND REDUCE FUEL CONSUMPTION REPROGRAMMING ECU! EASY AND SECURE CHIP TUNNING

How it is done:
KWP2000 is used for remapping your car to improve the performance of your car.

No matter the car model the KWP2000 can re-program the information stored in the ECU chip to optimize and improve the power of the car without having to jeopardize fuel consumption and the reliability of the car. The technical term used to describe the car switchboard is ECU-Electronic Control Unit. The ECU uses closed-loop control, a control scheme that monitors outputs of a system to control the inputs to a system, managing the emissions and fuel economy of the engine (as well as a host of other parameters). Gathering data from dozens of different sensors, the ECU knows everything from the coolant temperature to the amount of oxygen in the exhaust. With this data, it performs millions of calculations each second, including looking up values in tables, calculating the results of long equations to decide on the best spark timing and determining how long the fuel injector is open. The ECU does all of this to ensure the lowest emissions and best mileage.

Features:

- Connects to USB
- Supports high speed ECU flashing
- Led Indications for USB-power/CAR-power/rx/tx
- Can read and write a lot more ECU's than the normal KWP2000 Software

Functions:

This Kit can be used to read and write flash dumps of the most recent ECU's
It is very easy to use - You need only a PC with Windows and a USB port

Restrictions:
- Backup of the ECU memory is not supported for some of the listed ECU`s here
- Some ECU`s can not be flashed over the OBD2 connector in the car, in this case you have to remove the ECU from the car and flash it “on desk”

Its easy just connect cable from your laptop to your car, run program and thats all!!!

Reference: VAG-PROG

Name: VAG-PROG Interface with integrated dongle and OBD2 connector

Price: 760 Euros

VAG-PROG VIP Edition Interface with integrated dongle and OBD2 connector.

Features:
Compatible with diagnostic software’s used for Audi-VW-Seat-Skoda such as: VWTOOL, VAG-COM, etc.
Compatible with software used to reset airbags in VW-Audi using the OBDII connector
Correct/adjust KM without having to dismantle the car’s dashboard.
Program/reprogramming immobilizer

Compatible with:
almost all VW (Volkswagen and compatible) VDO dashes until 2004
(used in B5, B6, some Audi, Seat, Skoda Fabia, Octavia,Sharan, Galaxy, Alhambra)
With software such as: VAG DASHTOOL you can modify KM in the following dashboards: G4 VDO 93C86, G4 Motometer 24C02, Octavia VDO C66, Audi A6 VDO C66, Audi A3 VDO C66, B5 Passat VDO C86, and B5 Passat VDO C86.
Compatible with: Magneti Marelli dashboards
All VW Models that communicate by K-Line and have IMO in Dashboard.

Modify KM in the following car models:
AUDI
A3/A4/A6 with VDO dashboard, models 98-2000
A4 with older VDO dashboard without MFA, 95-97 models
A4 with older VDO dashboard with MFA, 95-97 models
A6 with older VDO dashboards, 95-98 models
A8 with older VDO dashboards, 94-12/96 models
A8 with VDO dashboards, models from 12/96 until 99
TT 2000

VOLKSWAGEN
Golf 4, Passat, from 1997 until 2000 with VDO dashboard and Bus T4
Golf 4, Polo, Lupo, Passat 2000 with Motometer dashboard
Golf 4, Passat from 2000-2001 with VDO dashboard and bus T4
Passat B5 until 2000 with Magneti Marelli dashboard
Sharan, New Betlees with Magneti Marelli dashboard
Golf 3 VDO
Passat 1.4 and Pasta 9196 with Motometer dashboard
Polo 6N with Motometer dashboard (almost all)
Lupo 1998 until 2001 with Motometer dashboard (almost all)

SEAT
Alhambra till 2000
Arosa

SKODA
Octavia

VOLKSWAGEN
Golf 4, Passat, from 97 till 2000 with VDO dashboard and Bus T4
Golf 4, Polo, Lupo, Passat 2000 with Motometer dashboard.
Golf 4, Passat from 2000-2001 with VDO dashboard and bus T4
Passat B5 until 2000 with Magneti Marelli dashboard
Sharan, New Beetle, with Magneti Marelli dashboard
Golf 3 VDO
Passat 1.4 and Pasta 1996 with Motometer dashboard
Polo 6N with Motometer dashboard (almost all)
Lupo 1998 till 2001 with Motometer dashboard (almost all)

Remark:
- Software is in Czech language only
- This is the so called new Tachopro

Reference: MB-CARSOFT

Name: Mercedes Benz Interface compatible with Carsoft 7.4

Price: 300 Euros

Functions:

MCU controlled Interface for Mercedes Benz Carsoft 7.4 which is compatible with the original interface.

Features:
Not compatible with CAN-BUS
Allows complete access to the cars systems
Erasing the Fault-Storage & Reset-Functions.Service Interval Reset, programming and other adjustements
Printing out a detailed Diagnostic-Report and integrated Customer Database
ECU-Coding, Live Data, Component Activation, Adaptation, synchronisation
Reading out the Complete Fault - Storage's
Manufacturer-Information about the Control Units

Package contains:

- MB Carsoft 7.4 Interface

Reference: ODB2VAG2X2

Name: Adapter cable OBD2 to VAG 2x2 for older VAG car models

Price: 29 Euros

This adapter cable will be necessary for VAG car models previous to 1995. For these cars you can still use the interfaces available in the market with EOBD connectors, but you will need this adaptor in order to connect the diagnosis interface into the diagnostic port of your car.

Reference: OPEL-TECH2

Name: Interface for Opel TECH2 Software with K-Line Multiplexer

Price: 77 Euros

RS232 Interface for the 3rd party Opel TECH2 Software with K-Line Multiplexer which does not require switching of diagnostic pins.

It can perform diagnosis of Engine, Transmission, Chassis, and Body systems for OPEL vehicles from year 1997 to 2004.

Workable Models

1997: CORSA-B, TIGRA, ACTRA-F, VECTRA-B, CALIBRA, OMEGA-B, FRONTERA, MONTEREY SINTRA

1998: CORSA-B, TIGRA, ACTRA-F, ACTRA-G, VECTRA-B, OMEGA-B, FRONTERA, MONTEREY SINTRA, ARENA

1999: CORSA-B, TIGRA, ACTRA-F, ACTRA-G, ZAFIRA, VECTRA-B, OMEGA-B, FRONTERA-B SINTRA, ARENA, MOVANA

2000: AGILA, CORSA-B, TIGRA, ACTRA-F, ACTRA-G, ZAFIRA, VECTRA-B, OMEGA-B, FRONTERA-B, ARENA, MOVANA

2001: AGILA, CORSA-B, CORSA-C, ACTRA-F, ACTRA-G, ZAFIRA, SPEEDSTER/VX220 VECTRA-B, OMEGA-B, FRONTERA-B, CAMPO, VIVORO, MOVANA

2002: AGILA, CORSA-B, CORSA-C, ACTRA-F, ACTRA-G, ZAFIRA, SPEEDSTER/VX220 VECTRA-C/SIGNUM, OMEGA-B, FRONTERA-B, CAMPO, VIVORO, MOVANA

2003: AGILA, CORSA-B, CORSA-C, MERIVA, ASTRA-G, ZAFIRA, SPEEDSTER/VX220 VECTRA-C/SIGNUM, OMEGA-B, FRONTERA-B, VIVORO, MOVANA

2004: AGILA, CORSA-C, MERIVA, ASTRA-G, ZAFIRA, SPEEDSTER/VX220, VECTRA-C/SIGNUM, VIVORO, MOVANA

Package contains:

- RS232 TECH2 Interface
- RS232 extension cable

Reference: KKL-PRO

Name: Diagnostic cable for ISO9141/KWP2000 transmission protocol

Price: 59 Euros

- Heavy & robust casing for rough service use
- Connects to PC via RS232
- Working for ISO9141/KWP2000 protocol
- Cable is based on certified ISO9141 Bus Transceivers and RS232 level shifters
- Bi-colour led for each K-line which shows the current logic status
- Powered from car battery over OBD2 connector
- Comfortable cable length of 2,00 metres

Compatibility:

This cable is applicable to the 1996 to 2005 VW/AUDI/SEAT/SKODA cars with K/L and single K line modes, except vehicles with CAN-BUS modes.

The diagnostic cable is usable for ISO9141 and KWP2000 transmission protocol like used for example by:
- Volkswagen
- Audi
- Skoda
- Seat

Important features:

1. This cable can not work if your car uses a protocol/bussystem like VPW, PWM or CAN-bus.
(There are 4 different bus systems under the OBD2 standard ISO/KWP, VPW, PMW and CAN)
2. K = Communication Line (A bidirectional halfduplex communication line)
3. L = Ignition Line for waking up the ECU (ECU = Engine Control Unit)

VAG-COM shareware download: VAG-COM

Applications of the VAG-COM Release 409.1

Module Version - identify the control module part number and coding version

DTC Memory - read and reset manufacturer diagnostic trouble codes

Actual Values - access live data

Activation - selected components can be activated

Code Module - code new control modules (most models through 2002)

Adaptation - read/reset Service Light parameters, view/change block learn values

Basic Settings - view and change control module default settings (Excluding 1.8T 01 and newer)

Reference: ELM323

Name: ELM323 Interface with integrated OBD2 connector (with MCU)

Price: 71 Euros

The ELM323 OBDII Interface, allows you to talk to your ISO 9141-2 or ISO 14230-4 standard OBDII equipped vehicle using an RS232 serial connection. It transparently converts between a 10.4KHz ISO data stream and standard ASCII characters, allowing trouble codes and operating parameters to be easily retrieved without the need for special software. No knowledge of data formatting, error checking, bus initiation etc. is needed either, as the ELM323 handles all of it for you.
The present version of the ELM323 (v2.0) provides several programmable features that the previous versions did not offer. It now allows programmable header bytes, adjustable timeouts, the ability to report in the packed data mode, and offers a special monitoring mode as well. This is in addition to all of the capabilities that the v1.x
ICs offered - the full seven byte command structure, two line (K and L) initiation.

Features:
- Heavy & robust casing for rough service use
- Connects to PC via RS232
- Working for ISO9141-2 and ISO14230-4 protocol over ELM323 Interpreter MCU
- Cable is based on certified ISO9141 Bus Transceivers and RS232 level shifters
- Bi-colour led for each K-line which shows the current logic status
- Powered from car battery over OBD2 connector

Main Function:
Read DTC
Clear DTC
Data Stream
Other functions depending on the software

Vehicles tested with ElmScan family of OBD-II Interfaces:

This interface supports the ISO9141-2 and ISO14230-4 protocols used mostly in Chrysler Corporation, European, and Asian vehicles.

Software for ELM32X-based interfaces:

Free software:
- Scantool.net
- GM Mode 22 Scan Tool by Terry
- OBD Gauge for PalmOS and Pocket PC by Dana Peters
- OBD Logger by Jonathan Senkerik
- OBD-II ScanMaster by Wladimir Gurskij (ScanMaster 3.52 - local copy)
- obd2crazy.com
- OBD2 Scantool by Ivan Andrewjeski
- OBDII for ELM322 by David Huffman
- pyOBD by Donour Sizemore for MacOSX and Linux
- RDDTC by Pete Calinski
- Real Scan by Brent Harris
- ScanTest for Pocket PC by Ivan Ganev aka a-ser
- wOBD by WDT

Non-free software:
- Digimoto
- ElmOScan NEW! by Softator (available in Finnish).
- PCMSCAN
- ProScan

Package contains:
- ELM323 Interface with integrated OBD2 connector (with ELM Chip)
- RS232 extension cable to connect the Interface to the PC

Reference: ELM322

Name: ELM322 Interface with integrated OBD2 connector (with MCU)

Price: 71 Euros

The ELM322 OBDII Interface, allows you to talk to your VPW (10.4KHz J-1850 VPW) standard OBDII equipped vehicle using an RS232 serial connection. It is typically used in US cars from General Motors and some from Daimler Chrysler. It transparently converts between a VPW J-1850 data stream and standard ASCII characters, allowing trouble codes and operating parameters to be easily retrieved without the need for special software. No knowledge of data formatting, error checking, bus initiation etc. is needed either, as the ELM322 handles all of it for you. The present version of the ELM322 (v2.0) provides several programmable features that the previous versions did not offer.

Features:

- Heavy & robust casing for rough service use
- Connects to PC via RS232
- Working for VPW protocol over ELM322 Interpreter MCU
- Cable is based on certified RS232 level shifters
- Led for Power and Databus which shows the current logic status
- Powered from car battery over OBD2 connector

Vehicles tested with ELM322 family of OBD-II Interfaces:

Make	Model	Year	Protocol
Buick	Century	2002	VPW
Buick	Rendezvous	2003	VPW
Buick	Rivera	1998	VPW
Buick	Skylark	1996	VPW
Cadillac	Deville	2000	VPW
Cadillac			

Reference: EDIABASBMW

Name: OBD2 Interface for BMW compatible with Ediabas/INPA software

Price: 98 Euros

* OBD2 Interface for BMW Ediabas / INPA Software
* 100% compatible with the original BMW Interface and all it's functions

Characterisctics:

- Connects to RS232
- Double K-Line support by two Motorola MC33199 K-Line drivers and logic gates
- Battery voltage detection by RS232 control line
- Ignition voltage detection by RS232 control line
- Switchable K-Line pullups by RS232 control line

Reference: TACHO-PRO

Name: TachoPro - OBD2 ISO9141 Interface + TachoPro dongle

Price: 360 Euros

TachoPro (OBD2 ISO9141 Interface + TachoPro dongle integrated)

This compact interface will allow you to easily read/write/modify the mileage/km on your car without the need to remove the dash. It connects to the on-board diagnostics port located in your car.

This kit will also allow you to use it as a diagnostic ISO9141 compatible interface. (See OBD2 diagnostic cable specification for details)
This tool is used daily by engineers all over the world and is very effective. The software is DOS based and in german, but very easy to use.
A laptop or PC is required, note that on very fast ones over 233 MHZ the software might not work.

Specification :
- Interface is based on certified ISO9141 Bus Transceivers and RS232 level shifters
- K-Line & L-Line (K/L Interface)
- Bi-Colour status LED`s for K-Line & L-Line
- Power LED
- Powered from car battery over service cable
- Service cables for BMW, Mercedes Benz and Volkswagen included
- Comfortable service cable length of 2,00 metres

Other Information :

1. The TachoPro software might not work on PC`s that are faster than 233 MHZ
2.Interface electronic of the Tachopro & K/L is the same, only tachoPro have the dongle inside so the tachopro software is possible to run and manipulate the mileage
3. Make sure using the Tachopro Software under PLAIN DOS only not under windows or a windows command shell
4. Scantool, scanmaster, digimoto are using another interface based on ELM interpreter chips and are not compatible to this interface (Of this ELM interpreter chips exist 3 pieces with different protocols)
5. For further dashboard problem, check pls. from what manufacturer your combi instrument is made, VDO(Siemens), Motometer or Magneti. The Tachopro can only work for Polo on the one made from Motometer
6. Tachopro supports cars up to 1999 sometimes to 2001 (from model to model)

Reference: USBOBD2KKL

Name: USB KKL OBD2 Diagnostic cable Volkswagen,Audi,Skoda,Seat

Price: 64 Euros

This diagnostic cable is usable for ISO9141 and KWP2000 transmission protocol like used for example by:

Volkswagen
Audi
Skoda
Seat

Features:
With this cable & the right software you are able to read/erase error codes and access all devices inside the car which are connected to the service bus. (Such as radio, airbag, dashboard, ABS, ECU, etc.) So it`s the perfect electronic diagnostic system to detect, locate and repair errors !

Specification:

Connects to PC via USB
Working for ISO9141/KWP2000 protocol
Cable is based on certified ISO9141 Bus Transceivers and USB level shifters
2 K-Line`s & L-Line (KKL Interface)
Because of it`s 2 K-Line`s it can also communicate with devices on 2nd K-Line on very new cars like latest Audi model`s
Bi-Colour status LED`s for both K-Line`s
Powered from car battery over OBD2 connector
Comfortable cable length of 2,00 metres

Remark:
This cable can not work if your car uses a protocol/bussystem like VPW, PWM or CAN-bus.
Terminal K = Bus of communication
Terminal L = Ignition for waking up car computing system (ECU: Engine Control Unit)
Existed 3 different protocols with same OBD2 connector incl. ISO/KWP, VPW, PMW
This K/L Diagnostic interface & cables work on ISO/KWP (Key Word Protocol) launched after 1996 only
Supported also ISO9141 protocol

VAG-COM shareware download: Applications of the VAG-COM:
http://www.ross-tech.com/vag-com/download/
Read & erase error code, log data e.g., speed, gasoline-consume, engine-rotating (RPM: Rotation Per Minutes)

Reference: OBD2-KKL

Name: RS232 KKL OBD2 Diagnostic cable Volkswagen,Audi,Skoda,Seat

Price: 60 Euros

Price: 45 Euros

This charger is compatible with Compaq iPaq 3830, 3835, 3845, 3850, 3870, 3875 3815, 3830, 3835, 3545, 3850, 3870, 3875, 3950, 3970, 3975, 1910, 5400.
iPAQ Car Charger Saves your cost without buying a alkaline battery anymore. Easy carrying and convenient purpose to charge in your car - for use in cars and trucks - direct output into the battery pack - precision molding fits all foreign and domestic vehicles - switching circuits prevents from heating up - short circuit protection - fused for extra safety.
Specifications:

Input: 10 to 36 Volts DC (Appropiate for cars, trucks or any type of vehicles)
Current limit
Short-circuit and overload protection

Reference: IPAQ-USB38

Name: USB Charge-Sync Cable for Compaq iPAQ H3800, H3900, H5500

Price: 30 Euros

Implemented through USB technology, the Sync-Charge cable is an excellent choice for any mobile traveler. USB offers an immediate power source from virtually all notebooks, so there is no need to worry about having the correct power adapter when traveling...The Sync-Charge offers you everything you need to power up and keep in touch.

Features:
Sync Cable Compaq iPAQ
All-in-one Cabling Solution- Allows You to Synchronize Data while Recharging Your Compaq iPAQ
Offers you an immediate power source from virtually all notebooks
Eliminates the need for the cradle
'One Touch' synchronization button
USB Speed and Convenience
No need to carry an additional AC to DC power adapter for charging Compatible with the following models:

Reference: PV-RS

Name: Palm V serial Autosync cable

Price: 19 Euros

The cable PV-RS connect your Palm V to your PC, you could find useful to have an additional RS-232 data cable to connect your Palm V, so you don't have to carry your cable from office to home.

Reference: BLUE-CAR1

Name: Bluetooth mobile phone handsfree car kit

Price: 84 Euros

At last a true hands free driving experience. BLUE-CAR1 Mobile Hands Free Car Kit gives you the freedom to drive without wires. Leave the phone in the briefcase or your pocket. No longer will you need to find your phone to answer a call. Plugs directly into your vehicles cigarette lighter or gives you the option of using its battery power supply.

Characteristics:
Compliance with Bluetooth specification version 1.1
Support RF power class 2
Wireless connectivity up to 10 meters
An answer/end button supports voice activation
Properties:
Operating frequency band: 2.402GHz to 2.480GHz unlicensed ISM band
Bluetooth specification: version 1.1
Profile supported: headset
Output power class: class 2
Sensitivity: -80dBm at 0.1% BER
Piconet: point-to-point
Link mode: SCO
Voice coding: 13 bits linear
Security: pairing, encryption and authentication
Power consumption: 12VDC from car battery Compatible Bluetooth Enabled Mobile Phones:

Description
The Blue-USB TM BluetoothTM USB Dongle is a quick, easy, and inexpensive solution for customers wanting to have a Bluetooth TM plug-on module to their PC now, giving them the ability to communicate with any peripheral BluetoothTM device.
The USB Dongle provides many services, among others:
Blue Manager :Provide automatic discovery and point-and-click management of devices, resources, and services.
Drag-and-drop file sharing: Makes information sharing simple enhancing Collaboration and productivity.
Wireless device synchronization: Update contact databases and calendars on Bluetooth devices quickly and conveniently.
Wireless dial up and LAN connectivity: Internet connect to the Internet or LAN through Bluetooth cellular phones (GSM,GPRS, CDMA) or through Bluetooth LAN access points.

Reliability
Internal antenna: Delivers clear, interference-free reception under optimal condition in a durable, retractable design.
Unique form factor: Provides Bluetooth connectivity to notebooks and desktops with USB port; two available cable lengths allow flexible location of the USB adapter for convenience and optimal radio reception.

Security
128-bit encryption support: Lets users exchange information in privacy.
Physical authentication: Identifies individual Bluetooth devices by their unique address and PINs.
User-level authentication: Keeps information secure by enabling user names and passwords.

Software Support
Windows 98/98SE/ME
Windows 2000
Windows XP

Specifications
Compliant with the BluetoothTM V1.1 specification
Class 2 operation
Fully BluetoothTM Version 1.1 qualified
Power by the PC
Full speed USB interface, compliant with USB 1.1
LED location
Software upgradeable
Built-in Antenna
Frequency band: 2.4Ghz unlicensed ISM band
Maximum date rate: 1M
Sensitivity: -89dBM@0.1%BER
10 meter working distance

Support profile
The Blue-USB USB Dongle supports the following profiles:
Dial-up Networking/Local Area Network Access/Fax/Serial Port/Synchronization/File Transfer/Generic Object Exchange

Reference: BLUE-TALK

Name: Universal Bluetooth Wireless Headset

Price: 119 Euros

The Bluetooth wireless headset uses the latest innovative design, it allows you to clip the tiny unit to your clothing, carriying in your pocket or wear around your neck. Freeing you from those bulky earpieces. Using Bluetooth wireless technology you can maintain contact with your cell phone from up to ten metres away.

Product specification features:

High-technology meets high fashion.
Three different colour Lexan detachable skins.
Bluetooth: Compliant with Bluetooth V1.1.
Battery: Rechargable Lithium Polymer.
Weight: Less than 30g.
Charger: Built-in, no external charger required.
Talk time: 3 hours talk time, 100 hours standby time.
Power Standard AC/DC adapter.
Operating distance: 30 feet (10 meters).
Voice command: For dialing out (subject to mobile phone support).
Noise: Noise canceling microphone.
Automatic reconnection if Bluetooth link is disrupted. What is Bluetooth? Bluetooth with its unique technology has created a new world of communication. Its advanced thinking has developed the ultimate in flexible digital devices that communicate and connect together. What makes bluetooth technology incredible is that it is wireless.
Bluetooth provides wireless communication between devices, seamlessly linking such hardware as mobile phones, PDAs, laptops, digital cameras and potentially a whole host of electrical devices.
Bluetooth is about wireless interoperability and the ability to communicate, access the internet, e-mail and information services anywhere, anytime.

Tested with all compatible bluetooth mobile phones: Nokia 8910, 6310 & 6310i, Ericsson T68i, T68, T65, T39 & R520, Motorola and Philips Fisio 820 Bluetooth Handsets.

Learn How To Fly In A Flash!!

Do It Before You Take Off!

Sky Warrior-1 Comes With Its Own Ground School!

Sky Warrior-1 Is Ready To Fly In The Box!!

Features:

Super tough, light weight airframe!

All molded plastic and foam construction

Ingenious thrust vector controls

Automatic climb mode

Two channel radios ergonomically shaped

Fly with one hand

Functions:

Training stand flight simulator for ground school.

Features auto flight mode for beginners and full control mode for more experienced pilots.

Simple right and left steering control

Thrust buttin for takeoff and climbing

Quick charger (Power Input: 220V, 2 Pins) built into controller, no separate charger to buy or carry.

Functional landing gear for realistic takeoffs and landings from hard, smooth surfaces.

Includes:

Full Function Control With "Fail Safe"

Rechargeable Flight BAttery

Portable BAttery Charger Built Into The Controller (Power Input: 220V 2Pins)

Detail Manual And Flight Guide

Reference: HELICOPTER

Name: Remote control Helicopter - SKY PATROL RADIO CONTROL

Price: 63 Euros

Now, you can take control of a sleek and nifty R/C helicopter without having to apply for a mortgage.
This is the finest entry-level chopper we've ever seen, and even the most maladroit wannabe pilot should be able to get this baby off the ground. .
The proportional control flight system uses a Scalextric-style trigger unit to regulate altitude and speed, whilst the light but durable body construction means that even Mike Smith-style pilots won't terminally damage the aircraft if it nosedives into the ground.
The helicopter uses a quick charger that resembles a landing pad and comes complete with a seriously funky 'fuelling' hose - simply attach the hose to the chopper, wait for the light to turn green and you're ready for take off. The Sky Patrol is pretty much plug-and-play.
It takes a little while to master the control - basically the harder you squeeze the trigger, the higher it flies in a pretty much forward direction. Ease off the trigger and the helicopter will lose altitude and start to turn; pull the trigger when it's facing the new direction you want to charge off in.

Flight time: On a full charge, and in low wind (0-8KM/H) conditions, the Helicopter wil fly for 30 seconds - 2 minutes. If your flight is less than 30 seconds - 2 minutes, you will need to change the batteries or recharge the plane. Once charged, try again.

Control Range: The control range of the Helicopter is 15m . DO NOT gly on windy days. Wind may overpower your helicopter and cause it to fly out of range. When the helicopter is out of range, you will not be able to control it.

SAFETY FEATURE: Internal Temperature Sensonr: The helicopter is equipped with a built-in temperature sensor. If the temperature of the helicopter becomes too hot, the sensor will begin to AUTOMATICALLY shut down the helicopter by slowing down the rotor speed. If this happens, your helicopter will appear to be landing. The temperature gauge is installed to prevent overheating and hlps to ensure a ling lifespan for the helicopter.

To Launch and fly higher: Pull the triggger inwards. The helicopter has proportional control. The harder you pull the trigger, the higher the

Reference: HOVERCRAFT

Name: Remote control Hovercraft

Price: 126 Euros

Ever driven a RC car through a puddle and wished you hadn t?

Ever wished that your RC boat would work on land?

Well if you have and even if you haven t, - everyone s a winner with a Hovercraft!

This R/C hovercraft is equally at home on land or water. Be it your living room or office floor or the local pond or river, this bad boy speeds across them all! The hovercraft is an all year round product, not restricted in the way RC boats are to weather conditions. If it s a nice day, down the local pond/lake. If its pouring down race around the house. If its snowing, that depends. If you can brave the cold this baby will glide across snow and ice with ease.

3 powerful fans propel this funky hovercraft to the amazement of onlookers.

Floating on a cushion of air you have full control via the transmitter included. Operating to a distance of 50 feet(aprox. 15.24 meters) and at speeds up to 10mph (aprox. 16kms/hr)!

Available in different designs and frequencies racing is also an option just watch out for ducks!!!.

Each hovercraft comes compete and ready to run with rechargeable battery included. They run for about 15mins then a simple recharge is required, then it s ready to go.

Not suitable for rough water.

Hovercraft Specification

Hovercraft with three powerful motors

Rubber air-bag skirt

Dual-drive props with safety cages

Top-mount air compressor

Dual-stick, three-channel radio control transmitter with lift-cut button Owner's manual

9.6 rechargeable battery pack

9V battery

Vehicle Dimensions: 15-1/2" (40cm)x 7-1/2" (20cm) x 5-1/2" (14cm)

Batteries last for 8-15 minutes then recharge

Comes complete and ready to run.

Reference: IR-MINICAR

Name: Infrared Remote Control Racing Car Keychain

Price: 15 Euros

A new miniture car design even smaller than our MINIRC-CAR, it is so small that it is able to fit in a keyring. You can take it anywhere and be able to play with it at any time and at any place. Features:
Small IR remote-controlled racing car
Available remote control distance up to 5 meters
Using innovative IR transmission technologies
Powered by internal easy-to-change Li-ion cell, the using time up to 1 month
Innovative storage case with a key ring
Net weight of the car: 8g
Innovative packaging
Size of the car is only 2 x 3 cm.

Reference: HOLUX-500

Name: HOLUX GR-500 GPS and GSM PersonalTracking System

Price: 300 Euros

The GR-500 from holux is designed to provide multiple purposes including Emergency, Security and Locating. With a built-in GPS the unit is capable of providing personal or vehicular security by using the mobile phone network. Simply install a SIM Card with preset phone numbers, and depending on how you want to use it, it will send a message letting you or someone else know there is something wrong.

It's capabilities are extensive, You can set it up to automatically dial out on a time interval or when a person or vehicle is moved. An SOS button is for emergency situations thus providing personal safety no other device can provide. The unit will also let you know if the internal battery is low so that you can be rest assured that the unit is powered.

Functions and Operations:

Being a multi-functional GPS tracking system, the operation of the handset might seem a little complicated at first.
We believe with a little time and practice, you can become efficient in using it. Before using the handset, note the following features. The handset features prevention of accidental key press. Every key needs to be pressed for over 0.5 second to activate its function, and other extra functions won’t be activated without receiving short messages in specified formats. .

Emergency Response Mode
When you encounter an emergency and need aid, regardless of the response mode, press down Emergency Key for one second and then release it to automatically active GPS. After the GPS is positioned, the current time and your longitude and latitude coordinates will be sent in the form of a text message to the first three numbers in the phonebook in SIM card or to the preset GSM Modem numbers.

Moving Response
You can also use the device to monitor a non-moving object or a person. . Before setting, bring the handset to a location that can be set as the central position, then press and hold both Speak and Power Keys for two seconds and then release. This will automatically activate the GPS. After it is positioned, the location is set as the central position. The GPS will be automatically activated every three minutes to check if the handset has moved. If the distance between the handset and the central position is larger than the preset range, the handset will send a text message consisting of its mode, current longitude and latitude coordinates, speed, and time to the first number in the phonebook in the SIM card or send to the preset GSM Modem numbers.

Scheduled Response
When user requires monitoring of the handset’s position on the basis of regular timing, the scheduled response can be activated and the time interval between each response can be set by sending a text message in the specified format to the handset. The handset will activate GPS positioning as scheduled and respond with a text message consisting of its mode, current longitude and latitude coordinates, speed and time to the first number in the phone book in the SIM card or to the preset GSM Modem numbers.If the handset fails to position - The Power Signal LED- will flash
continuously if it is unable to position within one minute, the handset will respond with a text message indicating the handset fails to position and displays the previously positioned longitude and latitude coordinates. If the user doesn’t change the response mode, then even if it is turned off and back on again, the handset will still be in scheduled response mode and the time interval remains unchanged.

Over-speed Response
When user requires monitoring the handset’s speed, the over-speed response can be activated and the speed limit can be set by sending a text message in the specified format to the handset. The handset will activate GPS positioning every minute. If the handset’s speed is over the preset speed limit, the handset will send a text message consisting of its mode, current longitude and latitude coordinates, speed and time to the first number in the phonebook in the SIM card or to the preset GSM Modem numbers.
If there are two consecutive failures in positioning-The Power Signal
LED - will flash continuously if it is unable to position within one minute, the handset will send a text message indicating the handset fails to position and displays the previously positioned longitude and latitude coordinates. If the user doesn’t change the response mode, then even if it is turned off and back on again, the handset will still be in over-speed response
mode and the speed limit remains unchanged.

Called Response
When user requires information about the current position, status or other settings of the product, regardless of the product mode, the product will send its current longitude and latitude coordinates, status and settings in the form of a text message by receiving a text message in the specified formats. It will automatically activate GPS positioning after receiving the text message and send this information to the first number in the phonebook in the SIM card or to the preset GSM Modem numbers.

If it fails to position- The Power Signal LED- will flash continuously if it is unable to position within one minute, the product will send a text message stating that it fails to position and displays the previously positioned longitude and latitude coordinates.
This function applies to all types of response modes.

Voice Response
The handset will check if the incoming call is one of the first three numbe in the phonebook of the SIM card when the user dials from other cellular phones. If not, it will automatically hang up. If it is, the handset will notify the user by a ringing tone. The user can press the Speak Key to answer the phone. To hang up, press the key again. Please note that the handset’s
speaker is located at the rear. This applies to all kinds of response modes.

Voice Call
The user can use the handset to dial up to three numbers maximum. After turning on the handset, press the Speak Key once to dial the first number in the phone book in the SIM card. Press the key twice to dial the second number
and press three times to dial the third. Please note that the time interval between each press must be less than two seconds. After three seconds the GSM Signal LED will start to flash. The user can then put the handset
near his ear, waiting for the person to answer the call. To hang up, press Speak Key again. Please note that the handset’s speaker is located at the rear.
This applies to all kinds of response modes.

Unit Overview
• Power Key Answer Key
• SOS Key
• Power Signal (Red) GPS Signal (Green)
• GSM Signal (Yellow)
• Strap Eyelet Battery Cover
• Speaker
• Accessory
• Screw Hole

Specification
1. Dimensions: 88*45*21 mm
2. Weight: 79 g
3. Battery: Li-Ion Battery, 780mA

Accessories
1. Leather Case
2. Strap
3. Li-Ion Battery
4. Charger Cable

Reference: HOLUX-212

Name: HOLUX Mouse GPS Receiver GR-212 (with PS2 connector)

Price: 125 Euros

Reference: HOLUX-270U

Name: Compact Flash GPS Receiver HOLUX Ultra GM-270

Price: 148 Euros

The GM-270U provides a host of features that make it easy for integration and use, it is equiped with the latest software available in the market:

• 12 parallel satellite-tracking channels for fast acquisition and reacquisition
• High speed signal acquisition using 1920 time/frequency search channels.
• Built-in hardware Tracking Loop Processor WAAS/EGNOS Demodulator
• Low power consumption with Star II / LP chipset
• Built-in rechargeable battery for memory and RTC backup and for fast Time to First Fix(TTFF)
• Support NMEA0183 v2.2 data protocol and SiRF binary code
• Trickle Power Enabled for Power Saving
• Enhanced algorithms -SnapLock and SnapStart provide superior navigation performance
• in urban, canyon and foliage environments
• Support CF card type I connector suitable PDA, Hand Held PC or PC device.

Other functions:
• Receiver L1, C/A code.
• Tracks up to 12 satellites
• Snap Start: <3 sec (at < 25 minutes off period)
• Update rate: 1 Hz
• Antenna Type: Built in Active Antenna
• Minimum signal tracked: -175dBW
• Dimension: 91×50 ×20 mm

Dynamic Conditions:
• Altitude 18,000 meters max. (60,000 feet)
• Velocity 515 meters / second max. (700 knots)
• Acceleration 4 G, max
• Jerk 20 meters/second, max

Position accuracy:
• Non DGPS (Differential GPS)
Position 5-25 m CEP without SA
Velocity 0.1 m/sec, without SA
Time 1 usec sync GPS Time
• EGNOS/WAAS
Position
< 2.2 m, horizontal 95% of time
< 5 m, vertical 95% of time

Reference: HOLUX-236

Name: GPS HOLUX GR-236 Bluetooth

Price: 128 Euros

The HOLUX GR-236 is a wireless GPS which communicates via radio with any device that has Bluetooth, such as: PDA, Tablet PC, Wall Plate, Mobile phones, PC. It has a mini USB connector that allows you to connect a Holux adaptor to your USB port in your PC or PDA to allow communication of any device that does not have Bluetooth.
GR-236 design is based on SiRF Star IIe/LP Low power consumption chipset, built-in rechargeable Lithium-ion (BL-5C) battery compatible with Nokia phone models 6600,7610…, and the working time lasts at least 10 hours. Provide Continue mode and Power saving mode for user’s requirement.

Characteristics:
• Travel power supply / Cigarette adapter
• AC Multi Power Plug Adapter
• Receiver accuracy: Normal 5-25 meters CEP without SA
• Dimensions: 46.3 X 67 x 19 mm
• Weight: 56 grams

Reference: HOLUX-231

Name: GPS HOLUX GR-231 Bluetooth

Price: 153 Euros

The HOLUX GR-231 Smart wire-less Bluetooth GPS Receiver is a total solution GPS receiver with Bluetooth, UART interface and built-in rechargeable battery for high sensitivity to tracking signal. GR-231 design is based on SiRF Star IIe/LP low power Architecture. GR-231 is a dual-function GPS receiver. This positioning application meets strict needs such as car navigation, mapping, surveying, security, agriculture and so on. Only clear view of sky and certain power supply are necessary to the unit. GR-231 contacts to other device through Bluetooth device, compatible interface of RS-232 or USB, and built-in recharge battery to save satellite information such as the status of satellite signal, the last location, date and time of last use. With low power consumption, the GR-231 tracks up to 12 satellites at a time, re-acquires satellite signals in 100 ms and updates position data every second.

Main functions
GR-231 provides a series of functions. It is well suited to system integration and
users who use PDA, Notebook PC with Bluetooth device.

• Built in SiRF Star IIe/LP Low power consumption chipset.
• 12 parallel satellite-tracking channels for fast acquisition and reacquisition.
• High speed signal acquisition using 1920 time/frequency search channels.
• Built-in WAAS/EGNOS Demodulator without additional any hardware. Or use the high-sensitive software to get the fast acquisition and reacquisition in the urban, canyon and foliage environments.
• Compatible with Bluetooth Serial Port Profile (SPP) completely.
• Low power consumption. Built-in rechargeable and changeable Lithium-ion battery without external power supply, and the working time lasts at least 9 hours.
• Provide Continue mode and Power saving mode for user’s requirement.
• Provide expand terminal contact to other system without Bluetooth device.
• Built-in rechargeable battery for memory and RTC backup and for fast Time To First Fix (TTFF).
• Support NMEA0183 v2.2 data protocol and SiRF binary code.
• 4 colours LED to show the status of device.
• Active antenna connector for getting better satellites signal.
• FLASH based program memory. New software revisions upgradeable through serial interface.
• Small, sleek, and lightweight design easily fits in your hand.
• Over-Temperature protection
• Enhanced algorithms -SnapLock and SnapStart provide superior navigation, performance in urban, canyon and foliage environments.
• For Car navigation, Marine navigation, Fleet management, AVL, Personal navigation, Tracking System, and Mapping device application.

Basic Specification
• Chipset SiRF Star IIe/LP chipset.
• Channels 12 parallel satellite-tracking channels.
• Frequency 1575.42 MHZ.
• Receiver L1, C/A code.

Receiver Accuracy
• Normal 5-25 meters CEP without SA.
• Enable EGNOS or WAAS:
Position: < 2.2 meters, horizontal 95% of time
< 5 meters, Vertical 95% of time
• Velocity within 0.1 meters / second
• Time 1 microsecond synchronized GPS time

Use Limitation
• Altitude < 18,000 meters (60,000 feet)
• Velocity: < 515 meters / second (700Knots)
• Acceleration 4 G.
• Jerk 20 meters / second, max

Other Functions
• Bluetooth frequency: 2.4 ~2.48GHZ
• Bluetooth Input Sensitivity: -80dbm
• Low sensitivity of receiving satellite signal -175dBW
• LED Functions Indicate Bluetooth status, GPS status, Battery Status and
• Battery charging status

System Requirement:
• CPU: IBM, Pentium, or other compatible PC.
• Memory: above 16 MB
• System: Windows 98/Me/2000/XP

Package includes:

• HOLUX GR-231 Bluetooth GPS receiver 1 Set
• Travel power supply / Cigarette adapter 1 Set
• AC Multi Power Plug Adapter 1 Set
• Manual and Driver CD 1 Piece
• GR-231 Quick guide 1 Piece

Reference: HOLUX-230

Name: GPS HOLUX GR-230 Bluetooth

Price: 129 Euros

The HOLUX GR-230 Smart wire-less Bluetooth GPS Receiver is a total
solution GPS receiver with Bluetooth, UART interface and built-in rechargeable battery for high sensitivity to tracking signal. GR-203 design is based on SiRF Star IIe/LP low power Architecture. GR-230 is a dual-function GPS receiver, with low power consumption. The GR-230 tracks up to 12 satellites at a time, re-acquires satellite signals in 100 ms and updates position data every second.

Main Functions:
GR-230 provides a series of functions. It is well suited to system integration and
users who use PDA, Notebook PC with Bluetooth device:

• Built in SiRF Star IIe/LP Low power consumption chipset
• 12 parallel satellite-tracking channels for fast acquisition and reacquisition
• High speed signal acquisition using 1920 time/frequency search channels

• Active antenna connector for getting better satellites signal
• FLASH based program memory. New software revisions upgradeable through serial interface
• Small, sleek, and lightweight design easily fits in your hand

Reference: GPS-EMAP

Name: Garmin eMap GPS receiver

Price: 437 Euros

Puts You on the Map
Built-in Basemap Shows Cities, Interstates, Exit info and More
Accepts data from MapSource CD ROM's
Compact, Portable and Lightweight
12 Parallel Channel GPS Receiver
Find cities, nearest exits and waypoints
Built-in trip computer provides trip odometer, stopped time, moving average, moving time, overall average, total time and maximum speed.
Map page displays direction pointer, speed, time, distance to go, time to go and trip distance
Save up to 500 important sites as waypoints
Multiple routes (1000 map points and 500 user waypoints in up to 50 routes with up to 50 points each).
2,000 track log points
Sun and Moon page
Memory backup
Compact size: 2.4 x 5.5 x 0.8 inches (6.1 x 14 x 2 centimeters)
Weighs only 6.7 ounces
Limited one-year warranty
Up to 12 hours use on 2 "aa" batteries

Here's another reason to toss out those paper maps: the eMap. It's the size of a small, flat calculator, contains a 12 parallel channel GPS receiver, and weighs a mere six ounces. Even with its compact style, the eMap boasts an extra-large display for showing even more map data with the same power you've come to expect from GARMIN handhelds even while operating for up to 12 hours on just two AA batteries.

The eMap features an internal basemap containing information on North and South America including state and country boundaries, lakes, rivers, streams, airports, cities, towns, coastlines, and U.S., state, and interstate highways. In addition, the eMap provides exit information for the federal interstate highway system. With the eMap, you will know when you are near services such as food, lodging, and service stations.For even more detail simply plug it into a PC and download data* from GARMIN's line of MapSource CD ROM's and you instantly get detailed maps. *Requires blank 8 MB, 16 MB, 32 MB, 64 Mb or 128 MB data card and PC interface cable to download map data

Whether you're cruising the streets, exploring the wilderness, or pounding the waves, GARMIN has the detailed maps you need. Choose the "U.S. Roads and Recreation" CD* for city street level detail and even inland marine features such as lake and river shorelines, boat ramp and marina locations. For your backcountry adventures choose GARMIN's "United States TOPO" CD-ROM maps* which are similar to U.S. Geological Survey 1:100,000-scale topographic paper maps and contain highways, roads, hiking trails, snowmobile trails, backwoods trails, elevation contours, point elevations, summits, lakes, reservoirs, small bodies of water, waterways, rivers, streams, and nautical navaids. Garmin's "World Map"* gives you worldwide coverage of coastlines, including a database of coastal cities, navaids and inland roads. *Requires blank 8 MB, 16 MB, 32 MB, 64 MB or 128 MB data card and PC interface cable to download map data

When paired with the MetroGuide U.S.A. CD-ROM*, the eMap has the ability to look up address and telephone number information for nearby services and points of interest. The eMap will store 8, 16, 32, 64 or 128 megabytes of downloaded CD-ROM information at a time depending on the size of the cartridge you use in the unit. *Requires blank 8 MB, 16 MB, 32 MB, 64 MB or 128 MB data card and PC interface cable to download map data

Designed with everyone in mind, this unit will take you from the car, to the hiking trail, to the beach without missing a beat.

Download eMap (3020K) Owner's and Installation Manual in an Adobe Acrobat .pdf* format.

Get a clear picture of where you are, where you've been and where you're going with eMap, the affordable electronic map. You'll love it as a roadside companion for interstate travel or getting to appointments around town. eMap is small enough to slip in your pocket but big enough to take on downloaded data such as street-level map detail and points of interest from optional MapSource CD-ROMs (Requires blank 8 MB, 16 MB, 32 MB, 64 MB or 128 MB data card and PC interface cable to download map data)

Reference: GPS-LEGEND

Name: Garmin Etrex Legend GPS receiver

Price: 465 Euros

12-Channel Receiver · Built-in Basemap
Accepts downloaded maps from MapSource
Rugged, Waperproof Construction
Find Cities, Exits, Waypoints and Points of Interest
8 MB internal memory for downloading MapSource maps
Stores 500 Waypoints with symbol; 20 routes with up to 50 waypoints each
Automatic track log saves up to 10 tracks to retrace your path
Built-in calendar with best fishing and hunting time recommendations
Compact size: 4.4 x 2.0 x 1.2 inches
Weights only 5.3 ounces
Up to 18 hours use on two "AA" batteries (not included)
Meets rigid IEC 529 IPX7 submersible standard*
Memory backup
Limited one-year warranty

*Electronics are protected if immersed, but battery compartment may get wet. Make sure batteries and compartment are dry before using.

With the eTrex Legend GPS, GARMIN has loaded a full basemap of North and South America into one small unit.

The basemap contains lakes, rivers, cities, interstates, national and state highways, railroads and coastlines. The Garmin eTrex Legend GPS is also equipped with additional memory totaling eight megabytes. The added memory allows the Garmin eTrex Legend GPS to accept downloaded map data from GARMIN's entire line of MapSource® CD-ROMs. The Garmin eTrex Legend GPS comes in a brightly-colored translucent blue case that really makes the unit stand out. New to the product design, GARMIN has included marine aids to navigation in addition to the basemap. These navigational aids are pre-loaded into each unit from the factory. Enjoy the astonishing detail of the Garmin eTrex Venture GPS's High Resolution (160 x 288 pixels) display and bright backlighting.

The Garmin eTrex Legend GPS supports the Wide Area Augmentation System (WAAS) differential GPS corrections through a system of ground stations and geosyncronous satellites. Without any additional equipment or fees, the Garmin eTrex Legend GPS uses WAAS to realize position accuracy of better than 9 feet, 95% of the time (typical)*.

*WAAS is available in Americas only. Accuracy may be degraded when view of the horizon is obstructed by trees or mountains.

Download eTrex Legend (988K) Owner's and Installation Manual in an Adobe Acrobat .pdf* format.

It's one of the smallest GPS units you'll find with built-in coastline, road and highway detail. The Garmin eTrex Legend GPS is right at home

Reference: GPS-SUMMIT

Name: Garmin Etrex Summit GPS receiver

Price: 426 Euros

12 Parallel Channel GPS Receiver
Barometric Altimeter · Electronic Compass
Compact, Lightweight, Rugged, Waterproof Construction
Elevation computer with current, minimum and maximum elevation and ascent/descent rate
Barometer with local pressure and 12-hour automatic trend recording
Stores 500 Waypoints with symbol
Stores 1 route with up to 50 waypoints
Automatic track log saves up to 10 tracks to retrace your path
Up to 16 hours use on two "AA" batteries (not included)
Message for arrival
Meets rigid IEC 529 IPX7 submersible standard
Weights only 5.3 ounces (150 grams) with batteries
Compact size: 4.4 x 2.0 x 1.2 inches (11.2 x 5.1 x 3.0 cm)
Limited one-year warranty

The eTrex Summit comes on the heels of the extremely popular eTrex, which was designed for both marine and recreation use. This new all-in-one navigation device for the outdoor enthusiast is the first combination GPS, altimeter, and electronic compass. The electronic compass provides bearing information when you're standing still and the altimeter determines precise altitude, so you can tell how high you've climbed and your rate of ascent.

Like its predecessor, the eTrex Summit boasts a powerful 12 parallel channel GPS receiver and comes packaged in a small, sleek case with operating buttons located on either side of the unit. The case is completely waterproof to withstand immersion in one meter of water for up to 30 minutes.

The eTrex Summit : It's what the hard-core outdoorsman has been waiting for.

Download eTrex Summit (1.4 MB) Owner's and Installation Manual in an Adobe Acrobat .pdf* format.

This compact, go-anywhere GPS includes a barometric altimeter and an electronic compass for accurate elevation, direction and location reporting for your outdoor adventures.

Truly a small wonder, the eTrex takes the best features of a 12 parallel channel GPS receiver and put them into a six ounce package that is only four inches high and two inches wide. The result is a unit that will literally fit in the palm of your hand.

Besides its small size, mariners and outdoorsmen will likely notice the sleek design of the eTrex. All buttons are located on either side of the unit, allowing for simple, one-handed operation that won't obstruct your view of the display. In fact, the eTrex features only five operator buttons for the ultimate in user-friendly design. Thanks to its bright yellow case, the eTrex will be hard to misplace and easy to find in any boat or backpack. The eTrex is completely waterproof so it can take an accidental splash or dunk in the water and still continue to perform.

Inside the eTrex, you will find the proven performance of a 12 parallel channel GPS receiver that will run for 18 hours on just two AA batteries. No need to worry about dense tree canopy with this unit, the eTrex will continue to maintain a tight satellite lock even while operating in forest-like conditions. The eTrex will store up to 500 user waypoints with graphic icons and boasts GARMIN's exclusive TracBack feature that will reverse your track log and help you navigate your way back home. In addition, the eTrex uses animated graphics that will help you identify your marked waypoints quickly and easily.

Download eTrex (867K) Owner's and Installation Manual in an Adobe Acrobat .pdf* format.

This compact, easy-to-operate GPS is perfect for hiking, hunting, camping, fishing - any outdoor activity where you need to pack light.
